DONIC® & FRIENDS

Dima Ovtcharov

Bronze Medal at Olympics in Men's single and team 2012, Silver Medal at Olympics in Men's team 2008, Vice-World Champion in Men's team 2010, 2012, 5-times European Champion Men's team Europe Top 12 winner 2012, German Open winner 2012

Patrick Baum

Quarter-Finalist WC 2013 Men's single, Vice European Champion Singles 2010, 2011, Vice World Champion in Men's team 2010, 2012 4-times European Champion Men's Team

Jörgen Persson

5-times World Champion, 9-times European Champion, Top 12 Winner, World Cup Winner

Jan-Ove Waldner

Olympic Champion, many times World and European Champion, Top 12 Winner and World Cup Winner, many times Swedish Champion

Kirill Skachkov

Europe TOP 12 Finalist 2012

Li Ping

World Champion in mixed doubles 2009 Singapore Open Vice-Champion 2007 Chinese National Team player

National Teams and European TOP-Clubs

Singapore National Ladies' Team
World Champion 2010
Vice World Champion 2012
Silver Medal Olympic Games 2008

The Austrian National Men's Team
Vice-European Champion 2005
Bronze Medal European Championships 2008, 2009, 2011
Sixth World Championships 2012

Singapore National Men Team
Quarterfinal World Championships 2012

GAZPROM Orenburg
European Champions League Winner 2012, 2013, Vice-Champion European Champions League 2011
Many times Russian Champion and Russian Cup winner, ETTU Cup Winner 2010

TTF Liebherr Ochsenhausen
Vice-Champion European Champions League 2009,
Vice-German Champion 2009, 2010, 2013 Twice ETTU Cup Winner,
many times German Champion, many times German Cup Winner

AS Pontoise-Cergy
Vice French Team Champion 2009, 2010, 2013
European Champions League semi-finalist 2013

TTC Rhönsprudel Fulda-Maberzell
First German Division, ETTU-Cup Finalist 2010

Werder Bremen
German Champion 2013

Swiss National Ladies' and Men's Teams

Luxembourg National Ladies' and Men's Teams

SVS Niederösterreich
European Champions League winner 2008
14-times Austrian Team Champion (2000-2013)

SV Plüderhausen
ETTU Cup Winner 2002, 2005, 2009.
German Cup Winner 2009

Angers Vaillante
Vice Champion ETTU Cup 2012
ETTU Cup-Winner 2008
Vice French Champion 2008

SPÅRVÄGENS BTK
Many times Swedish Team Champion

Budaörsi 21 SC
Ladies' Champions League Finalist 2013
Ladies' Super League Finalist 2013
Hungarian Team Champion 2013

OUR CLASSIFICATIONS FOR BLADES AND RUBBERS

Every table tennis player has his own individual style of play – as has every blade and rubber. It is now possible to obtain a distinctive match between the two. It has become very easy for a player to find the perfect match of blade and rubbers.

Few players have only one way of playing. There is a distinct basis of play but with other elements. For example, all-round players will take the opportunity to win the point by attacking when possible but attacking players are also sometimes forced into blocking or passive play during certain situations.

Similarly the performance of blades and rubber is not only one-dimensional. There is always a wide range of performance, which we can now illustrate. From DEF (defensive) - and + graduating through AR (all-round) to OFF (offensive).

The first step is to analyse yourself: what type of player are you? A rough distinction would be the following four categories.

DEF

You are a defensive player who prefers to slice the ball.

AR

You are an all round player who uses all TT techniques: chop, block, spin, and smash. You prefer tactical play and exact placement of balls or a speedier game.

OFF – Focal point SPIN

You are a strategic player who uses reversed pimples rubber. The main characteristic of your game is topspin. Playing close to the table or only from a short distance, you try to win your points with spin strategies.

OFF – Focal point SMASH

You prefer speed to spin. The main characteristics of your game are hard blocked balls and smashes with exact placement. You usually play with 'pimples out' rubber on the backhand.

BLADES

Our Compact Description will tell you which blade is suitable for which player type. Having considered the additional information – particularly elasticity, and the speed and control values, you will be in a position to make an informed choice.

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
6	10+							stiff

ELASTICITY

Control of the ball is effected when the ball makes contact with the bat. The elastic properties of a blade make you feel this contact. It is down to the individual which type of elasticity is preferred. We outline the five categories of elasticity. If you take these categories into consideration it will help determine your blade choice.

• Elastic

You can really feel the contact between ball and blade, often with a vibration. A good example is the defensive blade Donic DEFPLAY CLASSIC SENSO, which has excellent control.

• Control-elastic

Balanced, distinct contact between blade and ball with no disturbing vibration. Perfect control for all-round strategies, and when combined with spin elastic rubber also for offensive strategies.

Example: DONIC APPELGREN ALLPLAY SENSO.

• Speed-elastic

You still clearly feel the contact between the elastic blade and the ball, but this blade is obviously stiffer and faster than a control –elastic blade. Example: DONIC WALDNER SENSO.

• Nearly stiff

The vibration has been reduced to a minimum. You still have good ball contact. These blades are usually very fast. Example: DONIC PERSSON POWERPLAY SENSO.

• Stiff

The predominant characteristic is speed. Not always easy to control, but a good example for a solution to this problem is the DONIC BURN OFF.

Rubber Sheets

Our compact description will inform you which rubber is suitable for each player type. Having considered all the additional information, specifically the elasticity of the top sheet, the hardness of the sponge, and the control, spin and speed values, you will be able to make the ultimate decision.

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE HARDNESS
5+	10++	10+							medium +

PIMPLES - IN RUBBERS

The elastic properties of the top sheet determine the control of the ball and the characteristics of your rubber. We therefore outline the following categories according to the characteristics of the top sheet.

• HIGH FRICTION and CONTROL

These rubbers are not fast, but provide high grip. Their control is excellent. Due to the weak elasticity, the grip can only develop its effect on topspin when slow balls are played. Low spin dynamics in fast topspin games.

• STICKY

These rubber sheets offer good control and are very sticky, providing good spin when playing slow balls: i.e. service and first spin.

• CONTROL-ELASTIC

These rubbers develop spin elasticity even at low speed giving you more control and providing more playing fun. Suitable for control orientated players.

• STICKY-ELASTIC

Slightly sticky rubbers with very good spin dynamics and ball control when playing at high speed. Very sophisticated technology.

• OFFENSIVE-ELASTIC

Fast offensive rubbers. Speed is the predominant characteristic rather than spin. Interesting rubbers for fast aggressive players.

• SPIN-ELASTIC

Professional rubbers for today's top table tennis players. They not only have the speed of the offensive elastic rubbers but also the addition of spin characteristics.

The rubber sheet:

Pimples-in rubbers are mainly used. Pimples out rubber for speed players and long pimples and anti spin rubber for defensive players are encountered less frequently.

The sponge:

Sponges are available in several thicknesses. The thicker the sponge, the more difficult to control, but the more spin for topspin shots and the less spin for chopping. See our points for control, spin and speed in the Compact Description boxes.

Sponge hardness:

Modern rubbers usually have three differing degrees of sponge hardness. We always indicate these in our Compact Description.

• SOFT

Soft sponge provides better ball control. The spin remains the same while speed is slightly reduced.

• MEDIUM

The standard sponge offering a balanced relationship between control, speed and spin.

• HARD

These sponges provide more speed but less ball control.

The right sponge thickness... we recommend

DEF	1.0 to 1.5 mm
AR	1.5 to 2.0 mm
OFF	1.8 to max mm

BLADE AND RUBBER-RATINGS

3

All blade and rubber ratings have been determined during various tests in co-operation with, and constant feedback from many top players. The figures are from 0-10 (10++ being the highest score). These ratings should help you to make your decision. Please do not consider just the maximum rating but also your playing style when choosing your equipment.

DONIC

[MADE IN SWEDEN]

BLADES

Swedish Feeling OVTCHAROV SENSO V2

Ovtcharov Senso V2 continues DONIC's Senso-Technology's successful tradition and compliments the product range with a 5-ply V2 power allround blade.

Compared to the hard walnut outer ply of the Ovtcharov Senso V1 this blade has a softer mahogany outer ply, which gives the blade a distinctly softer feel when contact is made.

This blade "made in Sweden" has a perfect combination of specially chosen medium-hard plies which ensure a high degree of control

Ovtcharov Senso V2 is a solid blade for the player who especially values control but still requires power and speed when attacking.

straight · concave · anatomic | about 85 g | 5 Plies | Art.-No. 110 226

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY

4

Blue Feeling offensive control

Blue Feeling is another DONIC product to add to the successful tradition of „made in Sweden“ blades.

Specially created Ayous outer ply – suitably coloured and glued together in a variety of procedures, allowed to dry for a long time and pressed under heavy pressure. The result is a blade with sensational feel and unique design – a blue grain in the ply!

This hi-technology 5-ply allround blade with a slightly thicker inner ply, fairly hard Limba plies and the specially treated outer ply results in a blade with outstanding control and sufficient speed for an attacking player.

straight · concave · anatomic | about 85 g | 5 Plies | Art.-No. 110 207

THE LEGENDS A

OVTCHAROV
CarboSpeed

WALDNER
Legend Carbon

DONIC OVTCHAROV CARBOSPEED

DONIC WALDNER LEGEND CARBON

This is the quickest model in the new blade series.
 In its construction it is similar to the Waldner Legend Carbon, but differs slightly because of its somewhat thicker inner ply in combination with a high class Hinoki outer ply.
 It is a very fast carbon blade with great stiffness and almost impossible to break. Despite the high speed the blade is great fun to play with.
 For all out attackers with hard top-spins who prefer to counter-attack.

A new DONIC development – the blade you must have!
 Fast and relatively light offensive blade. Having a larger “sweet spot” ensures premium control. The blade has been designed with great care. The choice of wood plies – Hinoki outer ply in combination with carbon layers and a soft inner ply provide stiffness for good topspin. Especially for close to the table attackers who like to dominate.

AND THE FUTURE

BAUM
Esprit

DONIC BAUM ESPRIT

The blade of the two times European Finalist, Patrick Baum.

The artificial Aramid-Carbon fibre in combination with high quality wood-plyes ensure a precise ball return and outstanding offensive quality to the blade. In addition to being very fast, the Baum Esprit ensures maximum ball control in every playing situation. It is particularly suited for counter top-spinning and for touch play.

This blade is ideal for attackers who value spin but require sufficient speed from their strokes.

PERSSON
Seven

DONIC PERSSON SEVEN

A fine attacking blade from DONIC.

Especially developed for modern, dynamic top spinners and has a soft feel when striking the ball.

The 7-ply blade (Limba-Ayous-combination) has good feel and is very spinny. It also offers excellent control when hard top spins are required.

The perfect blade for intelligent attackers who vary their game and require spin, speed and maximum feel.

straight, concave | approx. 90 g | Art-No. 110 244

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
7+	9							nearly stiff

Veneer construction:
7-ply (Limba,

combination)

EXCLUSIVE

DONIC's "Exclusive" blade series at unbeatable value

The specially selected ply combinations provide these competition blades with increased control and smooth playing characteristics.

These blades are available in three speeds to suit different types of players:

► **OFFENSIVE:**
DONIC PERSSON EXCLUSIVE OFF

This is the fastest of the Exclusive blades. It provides outstanding power for effective fast topspin and hard smashes. In addition, the blade provides first class control with all variations of spin.

It is especially recommended for versatile attackers.

Straight, concave, anatomic | approx. 85 g | 5 plies

CONTROL			SPEED			ELASTICITY
7			7+			
-	AR	+	-	OFF	+	nearly stiff

Art. No. 110 232

► **ALLROUND PLUS:**
DONIC WALDNER EXCLUSIVE AR+

This blade combines excellent control plus speed. It is faster than the Appelgren AR and perfectly combines the power of an offensive blade with the outstanding control of an all-round blade.

Suitable for attacking allrounders who like to vary their topspin in a close-to-the-table game as well as playing away from the table without loss of control.

Straight, concave, anatomic | approx. 85 g | 5 plies

CONTROL			SPEED			ELASTICITY
8			6+			
-	AR	+	-	OFF	+	speed-elastic

Art. No. 110 231

► **ALLROUND:**
DONIC APPELGREN EXCLUSIVE AR

This blade offers superb control. The Appelgren Exclusive AR combines lightness with the unbelievable feel of an allround blade.

This blade is highly recommended for all-round players who value control when blocking but especially wish to incorporate variations of spin into their play..

Straight, concave, anatomic | approx. 80 g | 5 plies

CONTROL			SPEED			ELASTICITY
8+			6			
-	DEF	+	-	AR	+	contr.-elastic

Art. No. 110 233

Perfect price-performance ratio with the DONIC quality "EXCLUSIVE" seal.

DONIC BURNING TOX

DONIC BURN CARBOTOX

DONIC BURN ARATOX RS

DONIC BURN ARATOX

Two new related materials offer all ambitious players a new technology advance. Aratox and Carbotox fibres are incorporated in the production of DONIC BURN TOX blades – after the BURN technologies principle.

Both fibres are softer and more elastic than their predecessors ARAMID (which has been replaced by ARATOX) and CARBON (replaced by CARBOTOX). DONIC has used the highest quality wood plies for this series.

Thanks to their unique structure DONIC BURN TOX blades have good feel and are easy to use despite their apparent stiffness when striking the ball.

We offer a precise model from the BURN TOX blade series for every allround and attacking player, just as we did with the BURN series, an OFF, an OFF- and AR+ version.

DONIC BURN CARBOTOX

The BURN Carbotox is the stiffest and fastest blade of the trio and clearly belongs in the OFF category. The fine Mahogany outer ply paired with Kiri and Carbotox plies ensures speed and power for modern attacking table tennis.

straight - concave - anatomic | about 85 g | 5+2 Plies | ART-N°: 110 284

CONTROL	SPEED	-	AR	+	-	OFF	+
7-	10						

ELASTICITY
nearly stiff

Veneer construction:
7 ply
1.+7. plies: Mahogany
2.+6. plies: Kiri
3.+5. plies: Carbotox
Centre ply: Kiri

DONIC BURN ARATOX RS

The BURN Aratox RS version differs from normal BURN Aratox mainly through its outer ply. The harder mahogany blade makes it stiffer and more direct than the AR+ version. The blade's playing character is most suitable for the OFF- category.

straight - concave - anatomic | about 90 g | 5+2 Plies | ART-N°: 110 285

CONTROL	SPEED	-	AR	+	-	OFF	+
8-	9						

ELASTICITY
nearly stiff

Veneer construction:
7 ply
1.+7. plies: Mahogany
2.+6. plies: Kiri
3.+5. plies: Aratox
Centre ply: Kiri

DONIC BURN ARATOX

We have deliberately used a somewhat softer outer ply of Koto for the BURN Aratox, which offers greater control than Mahogany. This is a suitable blade for allround+ players who like to play a spinny game with soft rubber. This blade is, however, also suitable for a fast and dynamic game played with hard rubber.

straight - concave - anatomic | about 85 g | 5+2 Plies | ART-N°: 110 286

CONTROL	SPEED	-	AR	+	-	OFF	+
8+	8						

ELASTICITY
nearly stiff

3.+5. plies: Aratox
Centre ply: Kiri

DONIC BURN-TOX-series - there is fire in it!

A Star was »BURN«!

THERMIC BURNED TECHNOLOGY

The DONIC BURN series

The thermic treatment of the veneers makes for extremely high stability comparable to features of high-quality tropical woods. The blades are exposed to a temperature of 200 degrees centigrade for twenty four hours.

This process hardens the wood and removes any humidity.

The resulting playing characteristics of these blades are therefore unique.

DONIC BURN OFF

A stiff blade usually offers less control but this does not happen with DONIC BURN OFF. For a fast blade at 85 – 90 g it is relatively light and has an outstanding sweet spot. It won't be top heavy even with heavy and hard rubbers.

5-ply
1+5ply: Mahogany
2+4ply: Awan
Centre ply: Kiri

straight, concave, anatomic
Weight: 90 g. approx.
Elasticity: stiff

CONTROL	SPEED	-	AR	+	-	OFF	+
6+	10						

Art.-No. 110 283

DONIC BURN OFF-

The OFF- Version is even more controllable and has better feel than the BURN OFF blade. In harmony with the thinner middle ply it is slightly more elastic and in combination with somewhat softer rubbers imparts slightly more spin than the OFF version.

At a weight of approximately 85 g this is a standard weight for a high quality offensive blade. This beautifully produced high class blade in DONIC's series has a superb sweet spot.

straight, concave, anatomic
Weight: 85 g. approx.
Elasticity: nearly stiff

CONTROL	SPEED	-	AR	+	-	OFF	+
7+	9						

Art.-No. 110 282

DONIC BURN ALL+

The main priority in producing the Allround Plus Version of the DONIC Burn blade series has been to ensure ease of control and feel. The thinner Kiri centre ply of the DONIC BURN ALL+ offers greater control than the blades in the Offensive series. At 80 g this blade is highly suitable for players who prefer a lighter blade. The DONIC BURN ALL+ blade can also be used with harder attacking rubbers to produce fantastic speed. For an Allround blade this model is relatively stiff and combined with softer rubbers will develop plenty of spin.

straight, concave, anatomic
Weight: 80 g. approx.
Elasticity: speed elastic

DONIC®

DONIC EPOX System: Each blade a high quality original

DONIC EPOX series veneers are not glued with a liquid glue, but with a gluing coat of Epoxy resin.

The five veneers with epoxy coating are pressed together adding heat for 20 minutes. During this process the epoxy coating liquefies and glues the veneers together.

The middle veneer and two intermediate layers consist of monoblade veneers. Only one-piece veneers are used in this monoblade technique.

Other traditional techniques often use several pieces which are put together.

This means each pressed veneer is only used for one blade resulting in a unique blade of high-quality.

The unique method of gluing the plies of the EPOX-blades with epoxy resin ensures their special rigidity. Depending on the particular ply formation, extra power and speed are achieved. The blade has superior control without unpleasant vibration.

The edges close to the handle are carefully rounded off. This is the main reason why each blade of the DONIC EPOX series is very easy to handle.

Many players hold the handle differently for forehand and backhand shots. Due to the smooth, rounded handle, this presents no problems.

The DONIC FINELINE Covered System: An overall sure thing

The DONIC EPOX blades have an edge protection made of Fineline wood and are manufactured with the DONIC FINELINE technology. This innovative design has a 360° edge protection, which guarantees that DONIC EPOX blades look perfect for a long time. Due to their thin outer veneers, these blades are also very light in weight.

The combination of these refined technologies has created a high-quality product:

A new blade series constructed employing up to date techniques, carefully manufactured with a love for detail.

The „Fantastic Four“ DONIC EPOX blades

DONIC EPOX CONTROL

In the early 1980's Donic developed the Applegren Allplay blade, an absolute classic and still a best seller due to its all-round playing characteristics plus good control.

DONIC has recently created a comfortable player friendly blade with thin Finline outer veneers. This Allround blade has a positive influence on the playing characteristics.

As its name suggests, DONIC EPOX CONTROL offers outstanding controllability without unpleasant vibration. Used with medium to relatively hard DONIC Formula rubbers, this blade is also highly suitable for attacking players.

-	DEF	+	-	AR	+		

DONIC EPOX POWERALLROUND

DONIC was already a trend setter in the 1980's with fast allround blades and the legendary PERSSON POWERALLROUND.

One feature of the DONIC EPOX POWERALLROUND blade, which is also a fast allround blade, is the well-balanced combination between speed and control. The lightweight speed elastic all-round blade allows its use for all playing strategies in modern table tennis. The Powerallround veneer acquires a relatively high rigidity due to the Epoxy resin gluing, giving the necessary speed for an attacking game.

DONIC EPOX OFFENSIV

The controlled offensive version of the DONIC EPOX series with high speed and excellent control, suitable for all offensive strategies and due to its light weight, ideal to play with. Combined with soft to medium hard DONIC FORMULA rubber, the EPOX OFFENSIV blade produces outstanding spin. Its innovative and sophisticated design gives the DONIC EPOX OFFENSIV blade unique characteristics.

EPOX

14

DONIC EPOX POWERCARBON

The legendary Donic Persson Powercarbon, 'Made in Sweden', remains extremely popular. Now DONIC presents a further development with the EPOX and FINELINE covered system. The EPOX POWERCARBON blade has a carbon-fleece fibre layer between a FINELINE outer veneer and an Ayous middle veneer. It is, therefore even stiffer and more dynamic than the EPOX Carbotec.

An aggressive, high-speed blade of excellent design and high quality.

DONIC EPOX CARBOTEC

Carbon fleece is more elastic than carbon fibre. This produces a lively blade with good 'feeling' despite being stiff. The carbon fleece fibre lies between the Kiri centre veneer and an Ayous middle veneer. This is the reason why it is somewhat softer and easier to control than the EPOX Powercarbon. The ideal blade for attacking players who value spin and speed variation. The Formula DONIC rubbers such as Bluefire or Acuda are a perfect match for the EPOX CARBOTEC blade.

DONIC®

OVTCHAROV SENSO V1

**Blade Technology
made in Sweden**

The idea originated in Sweden and has found favour with world stars. A new gluing technology was established during the development of the DONIC Ovtcharov Senso V1 blade. DONIC's top player Dima Ovtcharov participated in the first tests and was delighted by the fantastic feel and unbelievable power of this blade. The 7-ply blade was developed to meet the new challenges the VOC ban presented to players. It is designed for high speed smashes and topspin. The inner plies are a carefully adjusted combination of medium hard and medium soft veneers. A revolutionary new gluing technology has been applied which results in additional rigidity to each single ply.

**A hard nut to crack for any opponent:
DONIC Ovtcharov Senso V1**

OVTCHAROV SOFT CARBON V1

OFFENCE WITH FEELING

Based on the best-selling Ovtcharov Senso V1 and Waldner Senso Carbon blades, DONIC have now designed a carbon blade which has a relatively soft feeling on contact with the ball.

Well thought out and carefully processed: The walnut outer veneers provide the required speed and hardness for an attacking, offensive game. The medium hard Scandinavian pine middle veneer causes high tension within the blade resulting in supreme dynamic and power possibilities. However, perhaps what is most remarkable considering that this is a fast offensive blade, is its exceptional feeling and amazing ball control qualities.

Two thin carbon middle layers and the Abachi middle veneer completes this top quality blade that is in a class of its own.

In combination with the Senso handle technology, a relatively soft carbon blade has been made with extremely good feeling – a model designed and then further enhanced on the basis of the best-selling Waldner Senso Carbon blade. Compared to the Waldner Senso Carbon, the Ovtcharov Soft Carbon V1 is slightly more direct when hitting the ball which results in even more speed. However at the same time even when playing short balls or a passive game you won't miss out on control.

DONIC Ovtcharov Soft Carbon V1 – Offence with feeling.

DONIC DOTEK

DONIC DOTEK

The Dotec grain is a wood grain developed by DONIC for the specific production of table tennis blades. This wood grain has been produced with particular emphasis on giving a light touch.

What exactly is the DONIC Dotec System?

The DONIC Dotec System is the wood technology without awkward edges. Since the human hand does not have hard edges, DONIC wanted to develop a smooth blade without sharp edges. It was, therefore, important to ensure a completely smooth transition between blade and handle.

The DONIC Dotec system is the technology that provides a blade with a perfectly smooth handle – a joy to grip.

DONIC PERSSON DOTEK OFF

Veneer construction:
0,6 Hinoki
DOTEK

GREAT
Feeling
in Handle!

The handle

The DONIC DOTEK model has a totally different handle to previous bats. The handle is made out of one piece, surrounded by natural cork. There are different versions for right and left handers.

DONIC WALDNER DOTEK CARBON

The carbon layers are placed on top of a 4 mm strong Balsa core. Covering and middle plies consist of 0,6 mm Limba for each ply.

Playing Characteristics:

The combination of Carbon, Limba, Balsa and Dotec ensure an extraordinary synthesis of speed and control. Despite the enormous potential for speed, quick topspins and smashes, the ball control for touch shots and slower play is remarkable with this blade.

Veneer construction:
0,6 Limba
0,6 Limba
Carbon
4,0 Balsa
Carbon
0,6 Limba
0,6 Limba

DONIC WANG XI DOTEK CONTROL PLUS

The outstanding qualities of the DOTEK series – now available with a straight handle and improved control.

Wang Xi, one of the world's best defenders, demands first and foremost that his blades give him the fine touch and precise placement for which his game is known.

These requirements are fulfilled one hundred percent by the DONIC Wang Xi DOTEK Control Plus blade.

This is the first time that the proven DOTEK Technology has used a 3.5 mm DOTEK Kiri middle ply. The combination of Kiri with 0.6 mm thick Limba exterior and the 0.6 mm thick Ayous inner plies give the blade the necessary stiffness for controlled counter-attacking.

The Wang Xi Dotec Control Plus with its excellent playing properties provides not only control but reserves of speed to enable positive all-round players to go on the attack.

Veneer construction:
0,6 Limba
0,6 Ayous
DOTEK
3,5 Kiri
DOTEK
0,6 Ayous
0,6 Limba

This is the ideal blade for players who value control but not at the loss of their attacking play.

This blade is available for the first time with a straight handle, making it easier for defenders to "twiddle" their racket.

| ABOUT 80 g | 5+2 Plies |

WALDNER SENSO ULTRA CARBON

The particular feel-typical of Waldner

Jan-Ove Waldner has been to table tennis what Mozart was to music. Waldner was a fan of the standard blade DONIC Waldner Senso Carbon for many years. This legendary blade has, however, been further developed and improved, in collaboration with the greatest table tennis player of all time. DONIC has designed a faster version of the Waldner Senso Carbon blade. The Waldner Senso Ultra Carbon is a light Carbon blade with impressive ball control and feel - ideal for an inspirational player. The increase in speed is due to hard Carbon plies which have been placed around a relatively thin middle veneer. The inner and outer veneers with varied hardness give this blade superb touch.

straight - concave - anatomic | about 80 g | 7 Plies | ART-N°: 110 209

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
8-	9							nearly stiff

PERSSON POWER CARBON

The ideal weapon for aggressive attack players

This model will convince all players relying on speed and aggressivity. Its basis is the successful Persson Powerspeed blade "made in Sweden" up-graded with two additional carbon layers. The result is a hyper fast power blade, which is relatively soft to the ball and sensitive and quite easily controlled due to the Senso V1 void in the handle. .

straight - concave - anatomic | about 90 g | 7 Plies | ART-N°: 100 209

PERSSON CARBOTEC

7-plyes

- 1.+ 7. ply: koto
- 2.+ 6. ply: carbon-glass
- 3.+ 5. ply: tanne
- Centre ply: kiri

Exceptional combination

Speed gluing has been banned but power shots haven't. Players who want to achieve optimum power and the highest speed need the Donic Persson Carbotec named after the 5-times Swedish World Champion. Because of its extreme speed and its stiffness, this carbon-glass blade is the answer for players who want to achieve optimum acceleration without speed glue, but through the blade. The carbon glass fibre blade is more elastic than ordinary carbon fibre blades. Despite the high stiffness, it offers superb feel. When combined with DONIC Formula rubber, the blade produces incomparable speed and spin without loss of control.

straight - concave - anatomic | about 90 g | 7 Plies | ART-N°: 100 291

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY

LI PING KITEX

7-plyes

- 1.+ 7. ply: kiso-hinoki,
- 2.+ 6. ply: ayous
- 3.+ 5. ply: texalium
- Centre ply: kiri

Kiso-Hinoki/Texalium

The blade of the young Chinese National Team player Li Ping who became World Champion in Mixed Doubles 2009. The Li Ping KiTex blade consists of high-quality wood plies with two extra texalium inner layers. The high-quality, hard hinoki outer plies, as well as the texalium inner plies, guarantee strength, flexibility, and power. The combination of the soft ayous inner ply and kiri middle layer produce a perfect synthesis between speed and control. If you are an attacker who, like Li Ping, has a varied topspin game, you will enjoy using this blade.

straight - concave - anatomic | about 90 g | 7 Plies | ART-N°: 110 241

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
7+	9+							nearly stiff

SENSO CARBON

CARBON, GLASSFIBRE, KEVLAR – HIGH-TECH-material with unexpected possibilities

In space technology, in aircraft construction and even for cars – especially racing cars, e.g. in Formula 1 – the design engineers are using more and more compound materials like carbon, fibreglass and kevlar. The reason: Higher stability at a lower weight. When these high-tech fibres are implemented in table tennis blades, the results are extraordinary advantages:

- low weight
- higher rigidity
- extremely high stability
- enlarged sweet spot
- more speed with almost the same control

The only disadvantage is that blades with carbon layers are inclined to feel relatively stiff and hard. DONIC has tackled this problem and developed carbon blades which are more player friendly. The result is really sensational.

DONIC Waldner Diablo Senso

DONIC Waldner Senso Carbon

A devilishly good blade: 7-ply gluing (5 wood plies, 2 glassfibre plies). For the versatile offensive player and for the aggressive allrounder. Quick, but very good ball control. Depending on the choice of the rubber sheet well suited for all levels. Relatively low weight.

Compared to carbon as well as kevlar models the playing characteristics of the bat do not change dramatically: e.g. blades with carbon layers give a relatively hard and insensitive touch. Glassfibre, however, gives you the same feeling as wood. The advantages of the DONIC SENSO glassfibre blades will certainly convince you.

HIGH-TECH-COMBINATION: SENSO-technology and glassfibre – a built-in chance for victory!

straight - concave - anatomic | about 85 g | 5+2 Plis | ART-N°: 100 202

CONTROL	SPEED	–	AR	+	–	OFF	+	ELASTICITY
8	8+							speed elast.

This model is based on the famous DONIC Allplay, which is one of the best sellers in the world. Due to two additional carbon layers the Waldner Senso Carbon combines the unique characteristics of the high tech component carbon with the undeniably well-proven Swedish all-round construction in a perfect match.

The result is a fantastic playing characteristic providing speed and control in an ideal balance. Supported by the Senso V1 void this blade operates very elastic giving you the essential feedback of the bounce of the ball.

For attack players as well as for aggressive allrounders, the Waldner Senso Carbon is a perfect blade.

straight - concave - anatomic | about 85 g | 5+2 Plis | ART-N°: 100 219

CONTROL	SPEED	–	AR	+	–	OFF	+	ELASTICITY

devilishly good

CARBON
BALSA

DONIC WALDNER BLACK DEVIL CB

As exuberant as the playing style of the Master is the advanced technology and the revolutionary design of this "weapon". Carbon and Balsa have been combined by DONIC for the first time. The soft Balsa core results in a blade with unbelievably good control, particularly when returning the ball. Incredible power and speed can be achieved with the hard Koto middle plies and carbon fibre of the DONIC Waldner Black Devil CB. The light weight and enlarged sweet spot of the 7-ply high-tech product attains perfection.

Waldner's "black devil" will delight all attacking players!

straight - concave - anatomic | about 80 g | 7 Plies | ART-N°: 110 239

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
7	10-							nearly stiff

BLADES

20

BAUM CARRERA SENSO

High speed...
excellent control

The two times European Finalist Patrick Baum favours DONIC Senso Technology. His hard, relatively thick 7-ply offensive blade compliments his extremely aggressive game - fast topspin from both wings, hard smashes, power flips and dangerous solid backhand blocks. The Baum Carrera blade affords excellent control despite high speed. This is what one would expect from a DONIC Senso blade "Made in Sweden".

straight - concave - anatomic | about 90 g | 7 Plies | ART-N°: 110 235

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
6-	10							stiff

WALDNER DICON

Direct Control - DICON:
The advantage in feeling

Inside the DICON construction we have removed parts of the handles with a milling tool (see sketch).

This construction provides the following surprising advantages:
direct contact between the player's hand and arm and the blade, and more feeling for power and speed of the blade. Transmission of power between player and ball is direct, therefore you have more control of the ball.

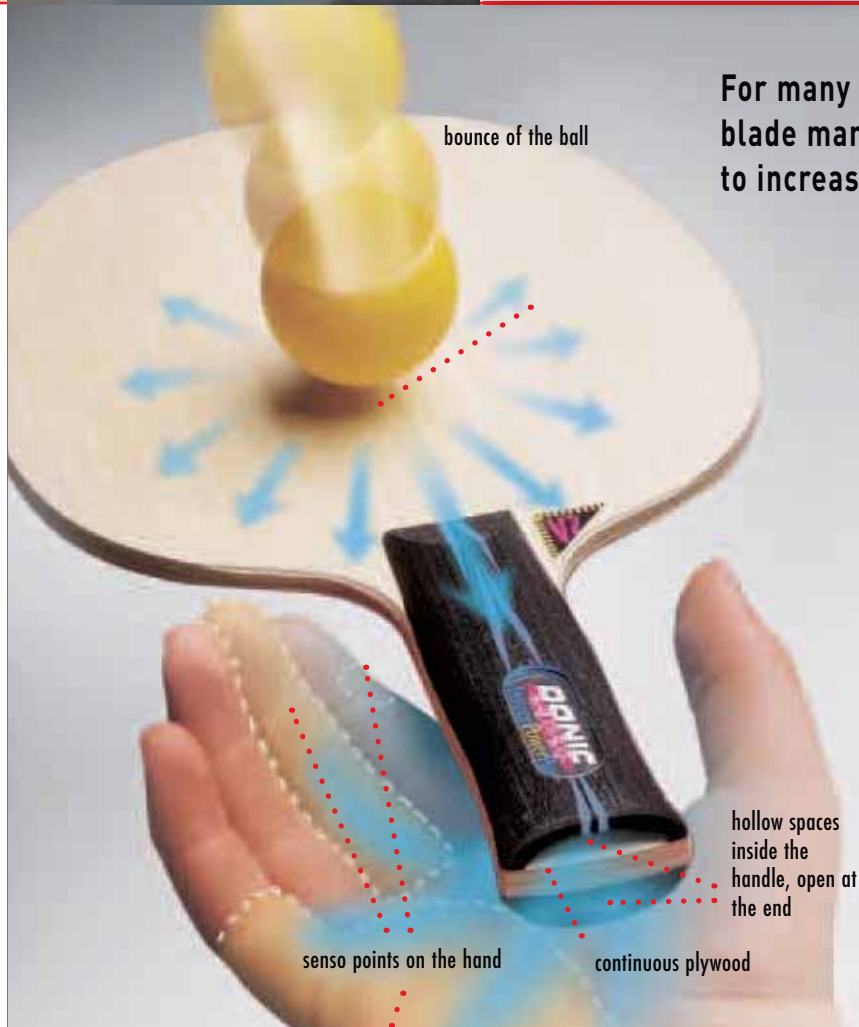

straight - concave - anatomic | about 85 g | 5 Plies | ART-N°: 100 222

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
7+	9+							nearly stiff

Handle the handle - feel the success

For many years, one of the World's most successful blade manufacturer's, conducted research in order to increase ball control.

Neurologists have taught us that the reactions of the human hand are more sensitive in some areas, in particular at the ball of the thumb and the middle finger. In these areas the hand has really good feeling for vibrations of a certain frequency.

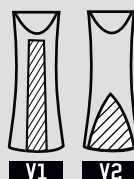

The DONIC technicians have applied this medical knowledge to their blades. They have designed blades where the handle and bat surface are one wood, which is the most important factor in achieving the highest durability. They also introduced the precisely calculated hollow spaces, which are open at the end. This ingenious construction transmits the feeling for the ball, starting from the point where the ball comes into contact with the blade, leading it to the 'Senso' points on the hand. This construction is an enormous step forward in blade technology. Perfect control - perfect feeling.

21

DONIC SENSO-TECHNOLOGY

- Perfect ball control
- Optimum feedback
- Exact recognition of ball-bat contact
- Handle adapted to the sensory system of the hand
- Considerably reduced weight
- Individual adaption of blade and player when choosing between optimum control or optimum speed

The DONIC SENSO system offers two versions with two totally different hollow spaces:

- SENSO V1** provides optimum speed with identical control.
- SENSO V2** provides optimum control with identical speed.

The Masterpiece

JAN-OVE WALDNER
The legend in table tennis

DONIC WALDNER SENSO V2

DONIC WALDNER SENSO V1

It's an ideal addition to the DONIC SENSO - series.
The speed of the wood is right between the Appelgren Allplay and the Persson Powerplay.
A classic Swedish construction which is second to none.
The 5.8 mm thickness of the blade provides more speed and fantastic control just as always.
Combining the DONIC SENSO technique brings perfection for all offensive and aggressive allround players.

WALDNER SENSO V2

WALDNER ALLPLAY

The legend in „Waldner Design“

The handle is made out of a dark natural wood incorporating the well known „Waldner Design“.

The surprising playing characteristics of this classic DONIC ALLPLAY blade made it a best seller all over the world.

The best ball control, high speed possibility, flexible for all playing situations.

Recognized all over the world for the terrific craftsmanship produced in Sweden.

The blade for those allrounders who want to play every shot.

Jörgen likes to have everything under control

Once a well known Swedish journalist wrote of the man who always seems humble, friendly, and good tempered: "But what he is really made of, you only realize when he plays table tennis. If it comes to all or nothing, the competitive spirit and steely determination are foremost."

For the last 20 years Jörgen Persson has been one of the world's top players. Already he is one of the best players in table tennis history.

Jörgen Persson – the many times world champion thoroughly tested the prototypes. When the series went into production, he immediately took one of the SENSO blades to play with. We quote Jörgen Persson: "I always feel the ball - no matter if I hit it slowly or fast. SENSO gives you the absolute feeling. It is always difficult to place controlled balls when using a fast blade like the POWERPLAY. The SENSO technology makes things much easier, since you get a prompt feedback from the ball."

DONIC PERSSON POWERPLAY

Fast 7-ply offensive blade made in Sweden that can be controlled even with normal training thanks to a special thin layer of foil.

DEFPLAY SENSO

The versatile defensive blade

V3

The demands that are made to defensive players have been increased in recent years. Specially designed for the modern, versatile defensive player, DONIC has developed a valuable help - the DEFPLAY SENSO:

A very special defensive blade

- The world's most successful veneer combination (5 ply allround) is manufactured with two dampening but elastic outer plies. (Gabon and Anegre),
- The vibration and the speed of the blade is reduced by increasing the size of the blade by 3 mm.
- The SENSO technology brings maximum dampening effect with the especially developed V3 void.

The result:

- Unbelievable control for all defensive shots.
- Fantastic acceleration for all offensive shots.
- Pure playing excitement.

straight - concave - anatomic | about 85 g | 5 Plies | ART-N°: 100 212

CONTROL	SPEED	-	DEF	+	-	AR	+	ELASTICITY
10	5							contr.-elast.

DEFPLAY CLASSIC SENSO

The cream of blades for classical defensive players

V3

As its name indicates, the DEFPLAY CLASSIC Senso has been developed by DONIC blade experts for the classic defensive game. Long range defence, as well as sudden unexpected attacking close to the table, can be successfully undertaken with this model.

Weighing approximately 70 grammes, this blade is a light weight amongst the modern blades despite its larger size.

Two balsa middle plies glued together, give the DEFPLAY CLASSIC Senso fantastic control and a superb feel.

The Koto and Ayous outer plies enable the player to switch to a safe attacking game when under pressure.

straight - concave - anatomic | about 70 g | 6 Plies | ART-N°: 100 211

CONTROL	SPEED	-	DEF	+	-	AR	+	ELASTICITY
10+	4+							elastic

CAYMAN

Good feel for pimples out players

SUPER LIGHT

DONIC developed with the CAYMAN an extremely light and relatively fast all-round blade with high rigidity and excellent control.

This blade is especially suitable for players using pimples out. The hard outer plies are particularly effective when using long or short pimples. Blocking and counter attacking become more dead-ly and more troublesome, especially for long pimples players.

Amazing control, with no lessening of speed, permits the player using this DONIC blade to attack and defend and enjoy his game. This does not only apply to players using pimples.

straight - concave - anatomic | about 70 g | 5 Plies | ART-N°: 100 277

CONTROL	SPEED	-	DEF	+	-	AR	+	ELASTICITY
8	8-							stiff

ALLIGATOR COMBI

The blade with two different sides

The main feature of the DONIC Alligator Combi blade is the difference in speed between the forehand and backhand playing sides. The AR+/Def+ blade is made of a 5-ply combination which has been carefully crafted to create perfect harmony between the different playing characteristics of each side. The core is made of soft Balsa wood which makes the blade very light and relatively stiff. On the forehand side, two harder and faster veneers are used, whereas for the backhand side somewhat softer and therefore slower veneers are used.

The result is that outstanding power can be achieved when playing topspin shots with the forehand side and fantastic control is guaranteed when playing a defensive game away from the table with the backhand side. The DONIC Alligator Combi is unique in that it complements both defensive play away from the table and attacking strokes and blocks close to the table. Players who use disturbing rubber sheets such as Anti and long pimple rubbers will be especially amazed by the enhanced playing possibilities of this blade.

straight - concave | about 80 g | 5 Plies | ART-N°: 110 249

FORMULA DONIC

HIGH SPIN + HIGH SPEED

The CATAPULT-oriented series

DONIC BLUEFIRE

The BLUEFIRE's main characteristics are its unbelievable dynamic and high arc when top-spinning.

This results in maximum rotation and further increased catapult effect. The BLUEFIRE M series is available in three different sponge hardness versions. BLUEFIRE JP available in two versions.

The SPIN-oriented series

DONIC ACUDA

S1 Turbo, S1, S2, S3

With ACUDA the focus is on maximising SPIN.

This series has a maximum flight arc with the take-off angle from the blade generally the steepest. Of course, these are very taut, direct and fast rubber sheets, depending on the grading S1, S2 and S3.

The SPEED-oriented series

DONIC COPPA

X1 turbo, X1, X2, X3

The COPPA series tends to be slightly softer.

The COPPA rubber sheets aren't quite so taut and come very close to the classic playing feeling with the emphasis on SPEED. The spin arc is very high and topspin shots can easily be played from all positions, especially from half-distance and far away from the table.

- AR + - OFF +

FORMULA DONIC - 3rd Generation

NEW

NEW

BLUEFIRE M1

The fastest and most dynamic rubber sheet of this high-tech series. For top players and players who practice a lot and prefer to use harder rubbers.

ACUDA S1 Turbo

Spin-optimized, high precision fast rubber with integrated turbo power! For aggressive acting top players who play close to the table and attach great importance on first ball attack.

BLUEFIRE JP 01

Extremely grippy, taut, though elastic top surface rubber which stays on the blade longer. For close to the table attackers as well as for those who like to play away from the table.

ACUDA S1

Spin-optimized, high precision fast rubber. For aggressive offensive players who play close to the table and attach great importance on first ball attack.

COPPA X1 TURBO PLATIN

Speed-optimized, high precision extremely spinny rubber. For offensive players who play with fast counter topspin from half-distance.

COPPA X1 GOLD

Fast high precision spinny rubber with perfect touch. For offensive players who play with fast topspin from half-distance.

BLUEFIRE M2

Excellent balance between speed, catapult effect and feel. For players who like to play with medium hard rubbers and attach high importance to spin and speed with optimum feeling.

COPPA X2 PLATIN SOFT

Well balanced rubber offering speed with control. For controlled offensive play, spin, block and smash.

ACUDA S2

Spin-optimized, soft and fast with perfect control. For power all-rounders and attacking players.

BLUEFIRE JP 03

Extremely grippy, taut, though elastic top surface rubber combined with a softer sponge. For players who prefer outstanding feeling with maximum control.

BLUEFIRE M3

A soft rubber with attitude! Perfect feeling combined with catapult effect. For players that prefer softer rubbers with fantastic control and good speed. Highly recommended for aggressive all-round players.

COPPA X3 SILVER

Very soft with superb control and a unique sound. For all-round players who require good control plus speed.

ACUDA S3

Spin-optimized, fast combined with perfect sound. For spin and all-round players who require excellent control.

INNOVATIONS IN THE FAST LANE

Our expert rubber sheet developers had exactly forecast that the speed glue ban that was introduced in 2008 would accelerate the rubber development enormously. The completely newly developed rubbers, we call them FORMULA DONIC FD3 (3rd generation), brings table tennis without speed gluing to a totally different level. There is now no reason to bemoan the loss of speed glue. FORMULA DONIC FD3 has it all: speed, sound, feeling and precision leaving nothing more to be desired.

A special feature of all the FORMULA rubber sheets is the exceptionally precise feeling. The rubber sheets respond immediately to the player's action, the ball lands exactly where it is supposed to. With such a wide range of rubbers available, every type of player will find the perfect rubber sheet for their playing style.

The series BLUEFIRE, ACUDA and COPPA have been completely redeveloped from top sheet to sponge, with many distinctive advantages, all of them intrinsic and permanently inbuilt. We have classified these series into a simple and clearly arranged system enabling each table tennis player to easily navigate their way and find the rubber they want.

FD 3 – FORMULA DONIC 3rd generation

No more speed gluing. No tuning, no juggling. The era of modern table tennis has started. More fun. Pure fun at the game. Honest victories.

The next rubber generation combines everything:

- Lifetime PLUS** The number of possible playing hours will be advanced by about 50%.
- Catapult PLUS** The catapult effect of the new large-pored sponge provides more precision when returning, even in difficult positions.
- Tension PLUS** Improved inner tension implies the feeling of even more "speed glue" energy.

THE NEW SOFT ONES: AS SOFT AS NEVER BEFORE

Players who used to like the sound and feeling of soft rubber sheets with speed glue prior to the glue ban can now reignite the joy and sensations with the series of SOFT rubber sheets. The versions Bluefire M2 and M3, Acuda S2 and S3, as well as Coppa X2 and X3 all belong to this new series. The softest versions are the M3, S3 and X3 with the loudest sound and slightly less speed, the M2, X2 and S2 are fractionally less soft with slightly less sound but an increase in speed. With all versions, topspin and counter-topspin can be played very easily and with fantastic control.

PLUS for all For all rubbers of the BLUEFIRE, ACUDA and COPPA series the number of possible playing hours has been extended considerably. Additionally the catapult effect and inner tension have been improved which results in greater precision on returns.

FORMULA DONIC – THE WELL-PROVEN TECHNOLOGY FOR MORE THAN A DECADE

ALWAYS STATE OF THE ART. The complete range for pimple-in players.

- AR + - OFF +

BARACUDA

The rubber sheet with strikingly different characteristics. Considerably more spin and more precision in all playing situations. Extremely high flight curve when playing top spin.

BARACUDA Big Slam

Noticeable softer and hence more control than Barcauda. Though very fast and well balanced, with great sound.

SONEX JP GOLD

Very fast, but well balanced in speed, spin and hardness

DESTO F1

Eliminated the need for speed glue, with the optimised control of the FORMULA rubber.

DESTO F2

This rubber offers great control combined with more attacking qualities

DESTO F3

The DESTO rubber for all-rounders and offensive players who aim for control

DESTO F3 Big Slam

The rubber with the loudest sound and huge control

VARIO Big Slam

The latest rubber sheet to create a cracking sound. A little slower and with better control than Desto F3 Big Slam.

QUATTRO FORMULA

The allround rubber with maximum control.

THE CONTINUATION OF A SUCCESS STORY

LT MAX ARC

NEW

BLUEFIRE JP 01 • JP 03

Japanese rubber sheet modalities have been incorporated in the latest production of Formula DONIC (FD3 3rd Generation) Technology. The result: Bluefire JP01 and Bluefire JP03.

This is a new type of pimples-in rubber in combination with the proven, dynamic blue sponge but with a somewhat finer pored structure. This lends the rubber sensational feel, with maximum catapult and a very high arc of the ball.

The very grippy, taut but elastic top surface rubber produces maximum spin when top-spinning and fantastic control due to increased contact on the bat.

BLUEFIRE JP is a very consistent rubber and suitable for most players. The quickest and hardest sponge version, BLUEFIRE JP 01 is especially recommended for close to the table attacking players as well as those who prefer to play away from the table.

BLUEFIRE JP 03 with a softer sponge has excellent playing qualities with optimum control. The perfect alternative for attackers as well as "power-allround" players, who value maximum control to return the ball under pressure in any situation.

DONIC BLUEFIRE JP 01

Playing characteristics: Extremely grippy, taut, though elastic top surface rubber. Produces maximum spin when top-spinning and stays on the blade longer.

Recommended for: close to the table attackers as well as for those who like to play away from the table.

Sponge: 1.8 / 2.0 / max
Surface: spin-elastic  Art.-No. 000 288

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE-HARDNESS
6+	10+	10++							medium

DONIC BLUEFIRE JP 03

Playing characteristics: Extremely grippy, taut, though elastic top surface rubber combined with a softer sponge. Ensures outstanding feeling with maximum control.

Recommended for: attackers as well as power-allround players who require maximum control to return the ball under pressure in any situation.

Sponge: 1.8 / 2.0 / max
Surface: spin-elastic  Art.-No. 000 289

LT MAX ARC

THE BLUE MIRACLE

DONIC's Bluefire is a completely new rubber development offering outstanding dynamic.

A new high-tech generation of rubbers in the proven Formula FD3-technology has been developed as a result of the perfect combination of the large pored blue sponge with an extremely spinny top surface rubber.

The top rubber with its small, long pimples-in structure lends the rubber the best possible flexibility and sensational feeling.

Above all, the Bluefire is unbelievably fast with a characteristic high arc when top-spinning that enables maximum spin and increased speed.

BLUEFIRE M1 in the hardest sponge version is the fastest and most dynamic rubber sheet of this new high-tech series.

BLUEFIRE M2 with its medium sponge combines the perfect balance between speed, catapult effect and feel. In combination with fast, stiffer blades, it presents its optimum potential.

BLUEFIRE M3 has a soft, dynamic sponge. Perfect adjustment of the soft version has resulted in precise feel, excellent spin and distinctive sound.

DONIC BLUEFIRE = MAXIMUM CATAPULT + MAXIMUM ARC

DONIC BLUEFIRE M2

Characteristics: Excellent balance between speed, catapult effect and feel
 Recommended for: Players who like to play with Medium Hard rubbers and attach high importance to spin and speed with optimum feeling

Sponge: 1.8 / 2.0 / max

FORMULA

S1 TURBO

DONIC ACUDA S1 TURBO

The Turbo version from the Acuda series is effective due to the maximum inbuilt speed glue effect which enhances speed and acceleration.

The DONIC Acuda rubbers became an immediate worldwide success the moment they entered the market. In order to offer unbeatable rubber technology for the top players DONIC included Turbo in the manufacture of its bestseller Acuda S1 series.

DONIC Acuda S1 Turbo is a precision rubber designed for accuracy at high speeds. Despite the rubber being dynamic and fast, it has perfect feel – reminiscent of earlier speed glue days.

Thanks to highly developed technology this advanced rubber from the house of DONIC produces good length when playing fast loops and that despite a characteristic high arc.

DONIC ACUDA S1

ACUDA S1 is a very fast rubber with outstanding spin qualities. Close to or away from the table it is possible to play "loop-loop" as in the days of speed glued rubbers. Despite its medium hard sponge ACUDA S1 is easily controllable and has a great feel. You can count on ACUDA S1 even in an awkward situation. This rubber may be fast but ball control is excellent.

DONIC ACUDA S1 TURBO

Characteristics: spinny, accurate top class rubber
 Recommended for: performance orientated attackers
 Sponge thickness: 1.8 / 2.0 / max
 Surface: spin-elastic

6-	10+	10++							medium +

FORMULA

Maximum speed when top-spinning.

DONIC COPPA X1 Turbo (Platin)

Compared to its predecessors, the COPPA series will produce more spin and a higher arc at maximum speed. COPPA X1 Turbo is especially suitable for topspin away from the table. In common with all the rubbers in the FD3 series COPPA X1 Turbo will ensure that your game is more accurate and less prone to error.

DONIC COPPA X1 (Gold)

The variation of the COPPA X series with a medium hard sponge. Even better ball control and feel with high speed and spin. The precision and control of COPPA X1 is second to none. The ideal rubber for most attacking players.

DONIC COPPA X1 Turbo (Platin)

Characteristics : speed-optimized, high precision extremely spinny rubber
 Recommended for: offensive, fast counter spin, half-distance play
 Sponge thickness: 1.8 / 2.0 / max
 Surface: spin-elastic

Art.-N°: 000 291

DONIC COPPA X1 (Gold)

Characteristics: fast high precision spinny rubber, perfect touch

**Gluing was yesterday
Today there is DESTO F1.**

DONIC DESTO F1

A high-tech product for well trained players of ability, who require more speed from their rubber. With qualities of spin and speed previously unknown for unglued rubber sheets. This inbuilt speed gluing effect produces good sound, softness plus speed and spin. This FORMULA rubber is exciting to play with.

We recommend DONIC DESTO F1 rubber sheets for the following players:

DONIC DESTO F1 is the ideal alternative for players who used to use speed glue. Newcomers to NEW FORMULA DONIC experience with the DONIC DESTO F1, table tennis from another world.

DONIC DESTO F1

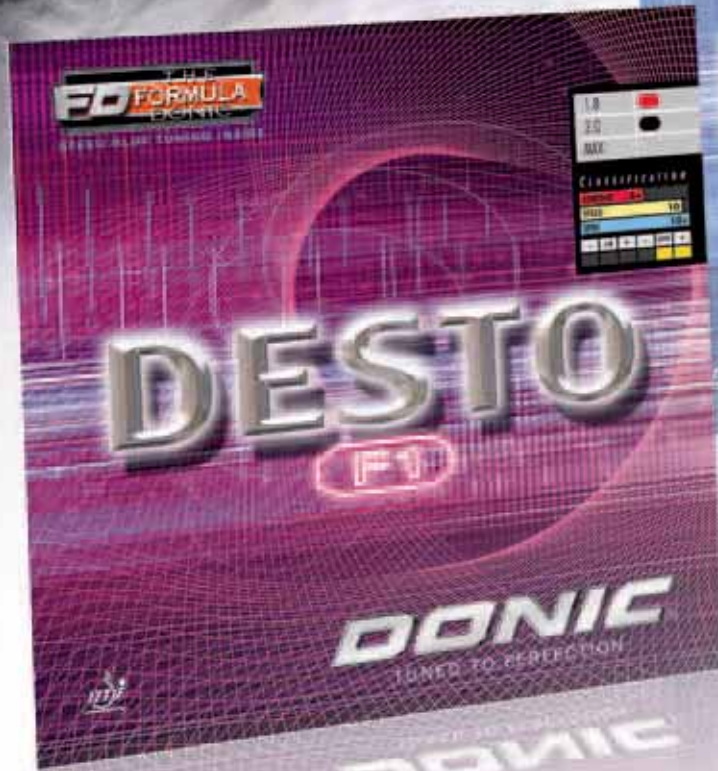

Sponge thickness: 1.8 / 2.0 / max
Surface: spin-elastic  ART.-N°: 000 221

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE HARDNESS
5+	10	10+							medium

DONIC DESTO F2

Sponge thickness: 1.8 / 2.0 / max
Surface: spin-elastic  ART.-N°: 000 225

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE HARDNESS
6	9+	10+							medium -

The happy medium: DESTO F2

DONIC DESTO F2 is the bridge between F3 and F1, giving great control at high speed. DONIC DESTO F2 is soft, has a good feel and the full sound of speed gluing. It produces far more speed than the traditional spin elastic rubbers, and the F3. It is, however, slower than DESTO F1. The DONIC DESTO F2 is soft and full of feeling, it has the speed gluing kick and of course, the excitement at play of the FORMULA DONIC technology.

We recommend DONIC DESTO F2 for the following players:

The DONIC DESTO F2 is for the player who in the past has used the traditional spin elasticated rubber, but is searching for more playing fun and more speed and spin. Players who find the DESTO F3 a little too slow, but find the DESTO F1 just a little too fast will discover that the DESTO F2 will give that extra edge to all aspects of their game that they have been searching for.

DONIC DESTO F3

Sponge thickness: 1.8 / 2.0 / max
Surface: spin-elastic  ART.-N°: 000 222

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE HARDNESS
	7	8+							soft

The special feeling: DESTO F3

DONIC DESTO F3 has the special playing qualities of the FORMULA DONIC series. It is somewhat faster than a traditional spin elastic rubber. This rubber is soft and dynamic, has excellent control, and the sound of speed glue.

We recommend DONIC DESTO F3 rubbers

to the following players:

Players who used to play with spin elastic rubbers without speed glue will have no adjustment problems by switching to DONIC DESTO F3.

Players who have used speed glue, will find that using DONIC DESTO F3 offers an alternative to speed glue.

DESTO F3 BigSlam generates a loud crack when you hit the ball!

This is the loudest DESTO FORMULA rubber that DONIC has ever produced. DONIC DESTO F3 BigSlam reproduces the loud sound that you got during the classic times of speed gluing.

The distinctive sound has been firmly and permanently incorporated into the rubber. BigSlam is somewhat softer, but not significantly slower than its successful sibling DESTO F3. It has the same amazingly simple ball control, but gives the same effect as optimum speed glue. Whether you prefer DESTO F3 or DESTO F3 BigSlam is a matter of taste or, should we say, of sound preference?

DONIC DESTO F3 BigSlam is recommended for players who value sound and outstanding ball control qualities rather than maximum speed.

DONIC DESTO F3 BIG SLAM

Sponge thickness: 1.8 / 2.0 / max
Surface: spin-elastic  ART.-N°: 000 220

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE HARDNESS
	7+	8+							soft

He is famous for his powerful backhand smash, yet experts say that his strongest weapon is his blocking game. Jörgen Persson's control on his backhand blocks is truly impressive compared to that of other players. He prefers to play with slightly softer rubber than other professionals. In fact, his choice of rubber is quite suitable for most table tennis players. Not surprisingly, the SONEX JP GOLD points the way to the future of rubber with built-in speed-glue effect that incorporates speed and spin plus good control. It has the essential qualities required now speed gluing is banned!

We recommend DONIC SONEX JP GOLD for:

Ambitious attackers who want a well-balanced rubber that has the effect of speed glue. This new generation of rubber offers a combination of excellent attacking characteristics with a built-in speed-glue effect.

Sponge thickness: 1.8 / 2.0 / max
Surface: spin-elastic ART.-N° 000 266

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE HARDNESS

TRACTION MS

The „SAT NAV“ for your bat.

DONIC has attained new dimensions of progress with their brand new TRACTION rubbers. This innovative TRACTION TECHNOLOGY ensures better adhesion and stronger friction. Similar to satellite navigation our TRACTION rubbers will despatch your top spin loops in the right direction.

TRACTION MS PRO

is the harder alternative for top class players. The taut top rubber surface and relatively hard sponge guarantee steep penetration and length with all top spin strokes. TRACTION MS PRO is ideal for aggressive services and returns due to the grippy top surface of the rubber. It also gives sufficient control for more defensive strokes.

Sponge thickness: 2.1 Sponge colour: pink
Surface: sticky-elastic ART.-N° 000 262

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE HARDNESS
5+	10+	10++							medium +

TRACTION MS SOFT

is the softer version, intended for the player who requires spin and control. Ideally suited as a backhand rubber for top players. In comparison to its harder "brother" TRACTION MS SOFT is somewhat more flexible. This rubber offers outstanding control, with a pleasant elasticity, yet it is very spinny.

Sponge thickness: 2.1 Sponge colour: yellow
Surface: sticky-elastic ART.-N° 000 261

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE HARDNESS
6+	9+	10++							soft +

The rubber with vicious spin

...now even more vicious !

Even more sound and control due to the softer sponge.

The FORMULA DONIC BARACUDA rubber with inbuilt speed glue effect produces fantastic spin. With DONIC BARACUDA the ball leaves the blade in a conspicuously higher arc, giving considerably more spin. The increased rotation of the ball stabilises the flight and increases speed. The results are convincing after only a few hours of training to become familiar with this modern rubber. Accuracy of placement is visibly improved even for top players. DONIC BARACUDA offers that extra margin of safety even in the tightest situation, and not only when engaged in a high risk top spin game.

DONIC BARACUDA's top rubber surface has been newly constructed to minimise abrasion and damage to the edges.

The happy result:
more playing hours with a surface that remains intact without noticeable damage.

DONIC BARACUDA

Sponge thickness: 1.8 / 2.0 / max

Jan-Ove Waldner and Jörgen Persson became World Champion in men's singles using Coppa rubber sheets

DONIC COPPA

For aggressive offensive players who operate with top spin, counter top spin and block techniques and who win their points with hard strokes. The ideal tuning between the highly elastic, spinny playing surface and the relatively soft, yet dynamic sponge giving you outstanding ball control.

Sponge thickness: 1.1 / 1.5 / 1.8 / 2.1 / max
 Topsheet: spin-elastic ■ ■ Art.-N° 000 251

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE-HARDNESS

DONIC COPPA TENERO

The well liked soft version of the bestseller DONIC COPPA. The DONIC COPPA TENERO has the same outstanding spin capabilities. Due to its soft sponge it gives greater ball control with slightly reduced speed! Absolute feeling for the ball.

Sponge thickness: 1.1 / 1.5 / 1.8 / 2.1 / max
 Topsheet: spin-elastic ■ ■ Art.-N° 000 252

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE-HARDNESS
8-	7	9+		■	■	■			soft

DONIC COPPA TAGORA

The Donic Coppa Tagora combines all the outstanding playing features of the Coppa and Coppa Tenero.

Tagora has at least the same speed as Coppa and the same outstanding control as Coppa Tenero. The secret is a highly elastic soft sponge from Japan.

Despite the extreme softness it delivers an unbelievable catapult effect.

The top sheet is designed for maximum grip and spin elasticity. The result, dynamic topspin, powerful shots, aggressive blocks and plenty of touch for short flips. Passive and soft blocks and even balls with under-spin can be easily controlled.

The classics of DONIC

·Made in Japan·

Tradition and modernity have got a name when talking about rubbers: DONIC VARIO

For more than 25 years the DONIC Vario rubber sheet series has been at the forefront of the sport table tennis. With the quality seal "Made in Japan" and known as extremely flexible, reliable and durable! Eminently suitable for beginners to top players!

VARIO = VARIATION = VICTORY

DONIC VARIO

Semi hard sponge, high grip, outstanding spin elasticity, high speed, good control. As its name indicates, this rubber is recommendable for all modern playing strategies.

Sponge: 1.2 / 1.5 / 1.8 / 2.0 / max
Surface: spin-elastic ■ ■ Art.-No. 000 201

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE HARDNESS
6+	8	9							medium +

DONIC VARIO SOFT

The pioneer rubber of the SOFT generation. The surface is absolutely identical to the sheet of the normal VARIO, but the sponge is softer. The results are a better control, somewhat less speed and identical spin characteristics.

Sponge: 1.2 / 1.5 / 1.8 / 2.0 / max
Surface: spin-elastic ■ ■ Art.-No. 000 202

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE HARDNESS

43

DONIC VARIO BIG SLAM

·Made in Germany·

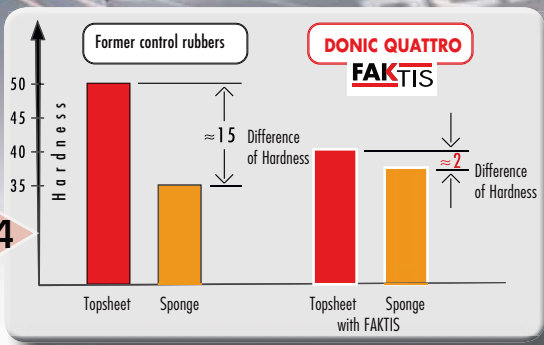

With Vario Big Slam, the DONIC team designed a rubber sheet which allows control and all round players with a tendency to an offensive game to advance to a new playing level. Due to its extremely soft 35 degree sponge, you get perfect feeling on the blade. This is the ideal rubber for spin and rotation players who prefer soft rubbers and like to hear a fantastic sound when hitting the ball.

Recommended for: Players who used to play with classical soft to medium rubbers and now want to switch to the perfect feeling of the NEW FORMULA DONIC rubber sheets. The VARIO Big Slam with inbuilt speed glue effect offers, those players in particular, unbelievable sound with excellent control and spin.

Sponge: 1.8 / 2.0 / max
Surface: spin-elastic ■ ■ Art.-No. 000 204

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE HARDNESS

Variation is the key to success: VARIO – the rubber that delivers it!

Safer play, not necessarily faster play. The DONIC QUATTRO with FAKTIS Technology.

It is old hat to produce control rubbers from soft sponge. We were no longer satisfied with that. A soft sponge also requires a soft top surface to achieve harmony between the top surface and the sponge.

Our experts therefore developed "FAKTIS", a technology for the top surface of control rubbers. FAKTIS top surface rubbers are as soft as control sponges. A fiendish construction of soft rubber and highly elastic synthetic rubber.

FAKTIS has achieved harmony between both natural and synthetic rubber. DONIC Quattro gives the player the means to play any type of stroke. The rubber responds to his wishes, enabling him to develop quick topspins, to counter attack and to block with a control rubber.

Play will be more consistent, even though it is quicker. DONIC QUATTRO is a WINNER!

Sponge Thick: 1.5 / 1.8 / 2.0
Surface: control-elastic ART.-N° 000 275

CONTROL	SPEED	SPIN	-	DEF	+	-	AR	+	SPONGE-HARDNESS
8+	7	10-							soft

Softer rubber produces more backspin The DONIC QUATTRO A'CONDA with FAKTIS-Technology.

It became obvious that the FAKTIS technology could also be used to produce an all-round and defensive rubber. Instead of synthetic rubber, we have used the softening process with a natural rubber. This is slower but affords maximum grip. The extra softness ensures that the ball enjoys a larger "sweet spot" when making contact with the rubber. The result is more backspin, longer contact and optimum ball control.

FAKTIS technology has provided DONIC QUATTRO A'CONDA with a grippy natural rubber, which preserves its appearance and spin qualities for much longer than is the case with tacky top surfaces. In addition, it has momentous spin!

DONIC QUATTRO A'CONDA SOFT
Perfect for defenders. Also highly suitable for all-rounders who require the best possible grip and control.

Points made by precision

Speed is not the only thing that counts. For many years the best players in the world used speed glue, as this did not only make the rubber sheets faster, but above all softer and at least subjectively, to get better control – although spin and speed have been increased. By adding Formula tuning to our QUATTRO rubber, we have increased the performance, but we have limited the speed to ensure that you can easily keep the rubber under control. As a result, QUATTRO Formula rubber incorporates all the traditional advantages of speed glue, while giving more ball control and higher precision. This makes QUATTRO Formula ideal for allround players and players who prefer good ball control.

No other rubber has ever provided such a good feeling with relatively high speed.

We recommend DONIC QUATTRO FORMULA rubber for the following players:

Allround players and control players who have been playing with soft, relatively slow rubber and are looking for a rubber with more speed that will provide more playing fun. If you are such a player, QUATTRO Formula will let you experience a new world of table tennis where you just play better. If you have been playing with 2.0 mm, we recommend 1.8 mm for QUATTRO Formula. This will provide more speed than you are used to, while giving you more control.

DONIC SLICE 40

The backspin makes the difference

The DONIC SLICE 40 has a sophisticated pimple design with a soft rubber surface tuned for defensive strategies. It is remarkably quicker than the former Slice rubber in its standard version. It offers more chop possibilities and more trickiness when defending.

The DONIC SLICE 40 is not only for control, but it also has very good offensive characteristics for top-spin and counter attacks.

Infinite tension

The DONIC pimple out programme is completed with DONIC BAXSTER F1-A a fast pimple out rubber sheet in FORMULA DONIC technology.

The typical softness of the sponge gives a superb feeling for the ball. The BAXSTER F1-A masters ball control in slow rallies, yet gives explosive power for fast strokes. This is the result of the integrated molecular tension of FORMULA DONIC.

RUBBERS

DONIC TWISTER LB

Infinite control

TWISTER LB is a newly developed medium to middle long pimple rubber made of a soft natural rubber mixture.

The chamfered pimple heads create a lot of spin and rotation in an active game. Due to its fantastic control, it's ideally suited for returning serves and for passive blocks.

With the TWISTER LB the variety of the game increases enormously. All kind of shot variations can be done by this "all-rounder" so that it's the ideal solution for pimple players at all playing levels.

- The 1.2 mm sponge is ideal for a defensive and control optimized game.
- The 1.5 mm sponge is perfect for a variable all-round game.
- The 2.0 mm sponge is ideal for an offensive all-round playing style.

DONIC BAXSTER LB

Infinite variation

The most striking feature of this latest innovation in the classic series with short pimples from DONIC is its enormous variety.

It is very easy to play dynamic blocks and counter attacks due to the NEW FORMULA DONIC sponge with high tension. The BAXSTER LB offers great advantages, due to its high control for returning serves as well as the possibility of adding rotation and spin by using a good technique, and generating a twist by the flick of the wrist.

The BAXSTER LB is the ideal rubber for experienced pimple players who would like to play a more variable and effective game without giving up outstanding control.

Many roads lead to victory

The ideal long pimped rubber for defenders and controlled allrounders who prefer to play a more aggressive game which wins points with variations.

Prodigious backspin for a defensive game, variations of spin when pushing, wobble effect when attacking: These options are all possible with the ALLIGATOR DEF.

In addition to making an astonishing variety of shots possible, this rubber ensures outstanding control whatever playing technique is used and is relatively simple to play with.

ALLIGATOR DEF is not only suitable for technically gifted players, but for all players using long pimples.

DONIC ALLIGATOR DEF:
A varied game is the key to success.

The technical defence rubber.

Classic defenders are a rarity nowadays and it's becoming more difficult for them to find the right equipment. All this changed when DONIC introduced their Formula DONIC technology into a long pimped rubber. DONIC PIRANJA FORMULA TEC is soft, very elastic, with excellent gripping qualities.

The DONIC PIRANJA FORMULA TEC enables the player to impart far more backspin against topspin than has been possible with other current rubber technology. The pimples are faster because of their inbuilt "speed glue" effect, ensuring more accurate blocking, counter attacking and variations of spin with considerable control.

DONIC PIRANJA FORMULA TEC is the best weapon for the technically gifted classic defender, particularly effective in combination with DONIC's modern sponge rubbers.

The most versatile of long pimped rubbers

DONIC AKKADI L2 is a versatile long pimped rubber which is equally effective for controlled play close to the table and for the classic defensive game.

Good control and the ability to impart a lot of backspin can be achieved with this rubber well away from the table. The version without sponge and 0.6 mm (with a very thin sponge) enables the player to play close to the table.

The new pimped top surface produces unexpected variations of spin.

The AKKADI L2 makes awkward attacking strokes possible and, therefore, has all the qualities of a genuine allrounder.

DONIC ANTI CLASSIC is the right answer for defenders and allrounders!

The flexible partner | The ALLROUNDER |

The elastic Anti-spin top surface and the soft sponge make this the allround classic amongst anti-spin rubbers.

The ANTI CLASSIC will bring joy to defenders who play with variety as well as allround players who attack close to the table. The outstanding control will be apparent in all playing situations.

Japanese high performance production has given these rubbers outstanding ball control.

ALLIGATOR ANTI

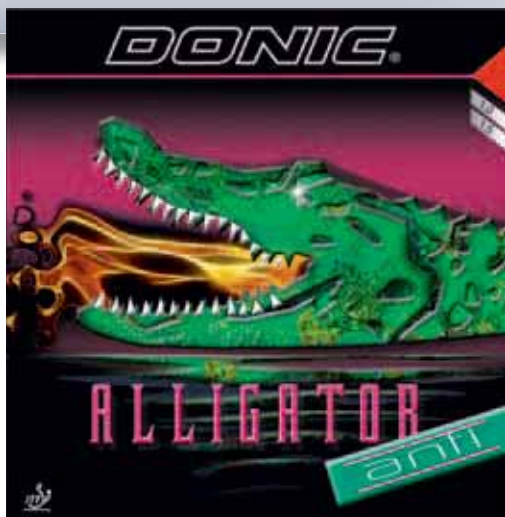

has bite! | Anti-loop rubber |

ALLIGATOR Anti-loop rubber follows in the footsteps of the successful long pimped rubbers PIRANJA and ALLIGATOR.

The taut anti-spin top surface rubber and the hard sponge ensure that the ball is returned with speed, therefore putting the opponent under pressure. The player is able to use effective variations and can drop the ball short with good touch. The opponent's shots can be returned short or long with this effective weapon. Attack and counter-attack are easily possible with DONIC Anti-loop rubber.

Sponge Thick: 1.0 / 1.5

DONIC ALLIGATOR ANTI – Opponents beware of its bite!

AKKADI TAICHI

BLACK IS POWERFUL

The very grippy top surface of the DONIC Akkadi TAICHI ensures maximum spin and rotation to a level never before experienced.

This is the reason why so many of the world's top ranked Asian players play with this kind of black rubber on the forehand. Due to its special black sponge the black Akkadi TAICHI is a bit harder and stiffer than the red version.

The red Akkadi TAICHI is more elastic and, thanks to its Japanese sponge, produces an even better bounce of the ball.

The black version is especially recommended for the forehand. It creates possibilities never dreamt of when serving to open the game and to produce the first top spin in the rally.

Sponge Thick: 1.5 / 1.8 / 2.0

DONIC LIGA PLUS

The new low-priced all-round rubber from DONIC.

The tried and tested DONIC LIGA top sheet has now been glued with a new more flexible sponge.

This combination guarantees even more playing fun with relatively high grip and spin.

The rubber with the perfect price-performance ratio!

DONIC LIGA

DONIC LIGA is a moderately priced allround rubber from DONIC. The DONIC LIGA is designed with a longer lasting top sheet and a somewhat more noticeable amount of grip and spin. Outstanding control.

DONIC TWINGO PLUS

The DONIC Twingo Plus is an excellent all-round rubber sheet especially suited for newcomers to competition table tennis. The speed, spin and control have been adjusted to complement a versatile all-round style of play. The grippy surface in combination with a soft sponge guarantees an outstanding feeling.

DONIC TWINGO

A lot of table tennis for little money!

The right choice for ambitious hobby players and newcomers to match play. A grippy, long lasting top surface combined with a soft sponge, guarantee top rate feel.

1 DONIC BLUE CONTACT

The DONIC Blue Contact Glue has been specially developed to improve the playing effects of large-pored sponges such as the DONIC Bluefire series. The glue's sticky consistency guarantees a strong adhesion but also allows the rubber sheet to be easily detached when changing rubbers without damaging the sponge. In addition if several layers of the glue are applied, spin and speed playing qualities of the rubber are enhanced.

90 ml bottle in set with accessories

Art.-no. 600282000

1 litre polythene screw cap bottle without accessories

Art.-no. 600283000

2 DONIC VARIO CLEAN

The DONIC Vario Clean has been developed according to the ITTF regulations. Without any volatile organic compounds (VOC) this water-based glue guarantees that the rubber sheet can be applied without any health risk. Easy handling and fast drying are two more characteristics of this top product.

Application: Apply the glue evenly on blade and rubber sheet using the clip fixture and sponge (included). After approx. 5 minutes apply the rubber to the blade using a pressure roll. If possible store the glue in a cool place. Made in Germany.

Available: 37ml / 90ml / 500ml refill pack

37ml Art.-N° 600 271

90 ml Art.-N° 600 272

500 ml Art.-N° 600 274

3 DONIC FORMULA FIRST

The DONIC Formula First is the ideal glue to apply all kinds of table tennis rubber sheets to the blade, especially the DONIC Formula rubber sheets with their high tension and speed glue effect. Perfect adhesion is achieved with DONIC Formula First. This water-based glue contains no volatile organic compounds (VOC) and complies with the ITTF regulations for table tennis glue. Made in Germany

Available: 25 gr bottle with integrated sponge / 500 gr refill bottle

25 g Art.-N° 600 276

500 g Art.-N° 600 279

4 DONIC FORMULA WOOD SEALING

Newly developed water-based lacquer without any volatile organic component (VOC) for the sealing of table tennis blades. Available: 25 gr / 100 gr

25 g Art.-N° 600 296

100 g Art.-N° 600 297

5 DONIC GLUING FOIL

Gluing foil without any volatile organic component (VOC). Ideal for a first application of rubbers to the blade. Also suitable for pimple out rubber sheets without sponge.

Art.-N° 600 281

6 · DONIC Easy Fix

The DONIC Easy Fix glue doesn't include any volatile organic compounds (VOC) and complies with the ITTF regulations for table tennis glues. It is very clean and easy to apply due to the included brush (after glueing, please clean the brush with water). The main features of this glue are the relatively short drying period and a very good adhesion.

Available: 25ml

Art.-No. 600270

FORMULA DONIC - Care instructions:

Due to the inbuilt speed glue effect FORMULA DONIC rubber sheets have increased tension which gives faster speed, higher spin and an improved bounce of the ball.

These high performance rubbers are more sensitive to outside influences and are more fragile than the classic rubber sheets, which have not been speed glued (e.g. DONIC Vario series).

The lifespan of each FORMULA DONIC rubber sheet varies, naturally, with the type of player, type of rubber, strain on the rubber and care by the owner. The lifespan, however, is considerably higher than that of the classic speed glued rubber sheet. Compared to an unglued classic rubber you can expect a lifespan of about 60 to 80 per cent.

Please note:

1. FORMULA rubber sheets should not be removed and glued again repeatedly.
2. The regular cleaning of the top sheet with VOC free DONIC cleaners or water is highly recommended.
3. The FORMULA DONIC rubber sheets should be protected against daylight or mechanical destruction by using the DONIC bat wallets.
4. Due to the higher tension of the FORMULA DONIC rubber sheets, the edges can break/crumble more easily. In order to avoid this, please use DONIC edge protection tape.
5. The bat must be protected against cold and heat. Particularly in midsummer and in winter you have to be careful that the bat with FORMULA DONIC rubber sheets is not exposed to very high or low temperatures. These extremes can cause the top sheet to become rough/brittle at low temperature and swell up at high temperature resulting in the life of the rubber being shortened. This means don't leave your bat in your car or in too cold or hot rooms for a long time!

**All rubber cleaners

WALDNER FLEX II

01 | SHOE »WALDNER FLEX II«

The latest improvement of the successful original model meets all the requirements for a table tennis shoe of the highest quality. The unique design of an especially non-slip sole and the use of a higher percentage of natural rubber ensure good grip. The upper nylon mesh material allows the foot to breathe and is extremely comfortable to wear. The DONIC Waldner Flex II is light and flexible and guarantees perfect balance, even with the most demanding footwork. The orthopaedic shock absorbing EVA middle sole and the reinforced cushioning of the inner sole make these shoes most comfortable. Additional shoe laces are included in the package.

Sizes: 33 - 47

01|1 white-blue

The ultimate DVD about the table tennis legend Jan-Ove Waldner

MAGICAL MOMENTS

The definitive DVD about table tennis legend Jan-Ove Waldner.

See the best table tennis player of all time in action, with the additional bonus of seeing "The Master" Jan-Ove Waldner demonstrate his serves.

This DVD affords one a glimpse at the history of table tennis, showing Waldner as a cadet and charting his unique career over twenty-five years form 1980 – 2005. The English speaking DVD with subtitles offers a fascinating look at Waldner's best rallies and strokes and illustrates his particular magic. His personality is revealed in interviews and close-ups. It shows his wonderful touch on

the table and his passion for the game. An absolute must for every table tennis fan. A great gift and an inspiration for everyone who cannot always motivate himself. Watching Waldner play renews one's enthusiasm for the game.

Supplier & Sponsor

ITTF approved

The official table of the Men's World Cup 2012 in Liverpool, the 2006 Liebherr World Team Championships in Bremen and 2007 Liebherr European Championships in Belgrade

Art.-N° 400 240

NANOGRIP SURFACE

- Advantages of the Nanogrip table surface compared to traditional table tops:
- bounce of the ball is more precise
 - improved speed and spin
 - higher spin of the ball due to enlarged contact area on the table
 - long-lasting construction
 - easier cleaning of the surface

The highest quality standard and design.

DONIC introduces the 'World Champion TC, a new generation of automatic tables with 'Twin Compact technic', which meets the highest requirements for safety, durability, set-up and playing characteristics.

TWIN COMPACT TECHNIQUE

quick release system

playback position

40 cm

wheel chair friendly

Technical specifications:

Complies with Industrial regulations DIN EN 14468 -1, class A for high performance sport, ITTF-approved.

Surface: 25mm Nanogrip playing surface in green or blue

Frame: 60 x 20 mm galvanised steel tubing

Foldable legs: 80 mm diameter steel tubing welded with 60 x 20 mm flat galvanised steel.

The height of the table can be adjusted as required.

Undercarriage: Galvanised steel construction.

Cross stabilisation: 50 x 30 mm

Covered mechanical side-drive

Leg height adjustor: 30 x 15 mm, silver, galvanised metal

Wheels: 4 driving wheels 125 mm with rubber tyres, 2 with brakes

Measures when folded: 1600 x 810 x 1580 mm

Weight: about 150 kgs

Wheelchair friendly

Playback position possible - you can play on your own.

The 25mm Nanogrip playing surface, combined with a perfectly balanced undercarriage, ensures top playing characteristics and true bounce.

A classic finish and the use of top quality solid metals guarantee high stability and a long-playing life.

Safety: A modern set up mechanism constructed in strong metal ensures that the table is easy to use. A broad wheelbase prevents the table from overbalancing. Delivery: In a special box. The table only requires a few minor adjustments before it is ready for play.

The Benchmark for tt-tables

In the early eighties the DONIC development engineers started to design a revolutionary tt-table and the technology was ready for production by the mid of the eighties. The international presentation of this new generation of tables was celebrated during the World Championships 1987 in New Delhi. The so-called DONIC Delhi table equipped with this SC-technology (SC = Super Compact) was the first automatic table ever used in a World Championships tournament – and it excited all experts that were present. This technology has recently been brought to perfection and modified to include the latest safety standards.

What are the main features of the DONIC SC-technology?

Delivered completely assembled

Completely assembled delivery, (transport secured), simply pull the table out of the special carton – unfold – play. No laborious assembly anymore!

Easy handling

Due to the synchronised folding mechanism, the weight of the tops is well balanced and the table is easy and safe to fold and unfold.

Security construction for space saving

The low centre of gravity gives many advantages with regard to handling, moving, saving storage space and security.

Optimised playing surface

The playing surface is of the highest quality and evenness, and is also durable and scratch resistant

Long-life construction

All parts that are exposed to wear and tear are highly strengthened and designed for decades of use.

Top quality "Made in Germany"

All metal parts are epoxy lacquered and thus permanently protected against corrosion. The SC tables are „made in Germany“ and of the highest manufacturing quality.

Robust steel tubing construction

High-quality steel tubing is used exclusively. Every table can be adjusted to any unevenness of to the floor using the special height adapting feet.

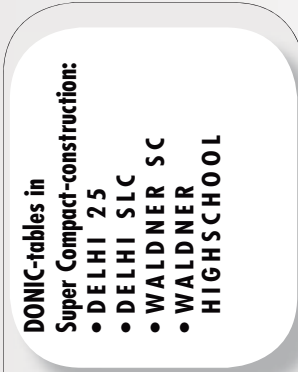

Highest safety standards

The additional security devices of the SC technology (e.g. synchronised folding mechanism, low centre of gravity) – as well as the new developed synchronised fold-unfold device of the DELHI 25 and DELHI SLC – minimise the risk of accident. Without doubt the SC tables meet the European standard DIN EN 14468 with ease.

Wheel chair adapted

DONIC Delhi SLC, DONIC Delhi 25, Waldner SC and Waldner Highschool are wheel chair approved.

DONIC-tables in Super Compact-construction:

- DELHI 25
- DELHI SLC
- WALDNER SC
- WALDNER HIGHSCHOOL

No wonder that the DONIC SC tables have been selected for many International (e.g. German Open, 2001-2004, 2008, 2009 and 2013; EC 2009, 2012, 2013) and National Championships (e.g. numerous German Championships) and that thousands of clubs world-wide are happy with this technology.

The Table of the:
 EUROPEAN CHAMPIONSHIPS 2009, 2012, 2013
 SPANISH OPEN 2011, 2012
 GERMAN OPEN 2001 – 2004, 2008, 2009, 2013
 GERMAN OPEN 2001 – 2004, 2008, 2010, 2011, 2013
 AUSTRIAN OPEN 2007, 2008, 2010, 2011, 2013

Art.-N° 400 241

Comfortable Handling

Long-lasting construction

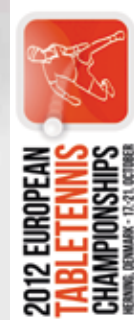

25 mm top

Space saving

Completely assembled

Made in Germany

Compliant with the
 DIN EN 14468-1 regulations

The table classic of the SC-Technology! The DONIC DELHI 25 table has been the benchmark for class and reliability. It has been further improved and modernised. Stronger folding legs and redesigned wheel fittings create a stable base and undercarriage, which also looks good. The silver metallic carriage and frame, with high stability and long lasting qualities, create a contemporary image. The sophisticated locking mechanism automatically ensures safety and stability when playing. To ensure perfect playing characteristics a 25 mm strong top surface has been fitted to the DONIC DELHI 25 table. The table is delivered **completely assembled** in a special box, and is **ready for immediate use**.

Technical data:

ITTF approved. Complies with German Industrial Regulation DIN EN 14468-1, Class A for high performance sport.

Surface:

25 mm green or blue (indoor)

Frame:

50 x 20 mm galvanised steel tubing

Foldable legs:

The weight bearing legs are constructed of galvanised steel tubing welded to 60 x 60 silver galvanised crossbars.

Undercarriage:

The weight bearing leg is of galvanised steel tubing 50 x 50 mm, welded to a 50 x 50 crossbar. Extremely stable wheel fittings also in a silver colour.

Mechanism:

The unique design includes a device to set up the legs.

All parts of the mechanism:

This is made of flat silver galvanised steel 50 x 3 mm. are galvanised

Wheels:

4 x 125 steering wheels with rubber tyres, 2 of which have brakes

Storage dimensions:

1525 x 1600 x 470 mm (width, height, depth)

Weight:

approx. 135 kg

Suitable for wheelchair-players

Comfortable Handling

Long-lasting construction

22 mm top

Space saving

Completely assembled

Made in Germany

Compliant with the
DIN EN 14468-1 regulations

Stable, Light, Compact (SLC): These are the main characteristics of the DONIC SLC. Advanced technology has been employed by German experts to equip this table with a clever safety system (similar to the Delhi 25), resulting in a table that is easy and safe to use and to store. Good looks have not been neglected. The silver metal frame and carriage underline the outstanding value of the table. With its practicality and value for money, the Delhi SLC is the ideal table for clubs or associations searching for top quality. The table is ITTF approved, and can be used at international tournaments.

Delivered completely assembled in a special box, the table is **ready for immediate use**.

Technical data:

ITTF approved. Complies with German Industrial Regulation DIN EN 14468-1, Class A for high performance sport.

Surface:

22 mm green or blue (indoor)

Frame:

50 x 20 mm galvanised steel tubing

Foldable legs:

Weight bearing leg made of silver galvanised steel tubing 50 x 50 mm. The height of the table is adjustable.

Undercarriage:

galvanised steel construction 50 x 50 mm, diagonally welded crossbars

50 x 30 mm, and solid silver steel galvanised wheel attachments.

Mechanism:

Unique leg height adjuster (flat steel 50 x 3 mm) silver galvanised.

All metal parts:

silver galvanised

Wheels:

4 x 100 mm steering wheels with rubber tyres,

2 with brakes

Min. storage dimensions: 1525 x 1600 x 440 mm (W x H x D)

Weight: 110 kg approx.

Suitable for wheelchair players

Another table with the proven Twin Compact Technology

Complies with the European Norm DIN EN 14468-1
Class A for high performance sport.

- Comfortable handling
- Long lasting construction
- 22 mm top
- Almost completely assembled
- Made in Germany

Another table with the proven Twin Compact Technology. With the patented and well established closing mechanism of the DONIC World Champion TC table. This new table is also constructed on a metal base. All individual metal parts are beautifully made and durable, functional, as well as attractive to look at. Like its "big brother", the DONIC Champion TLC is solid and safe, whether used in play or parked. The table is delivered almost fully assembled and in its own special box.

Technical Data:

- 22 mm green or blue
- Frame: 50x20 mm steel tubing, silver coated
- Folding leg: Supporting leg made of steel tubing 50x50 mm, stabilized by silver coated crossbars and a mechanism to alter height.

Art.-N°: 400 245

- Undercarriage: Driving mechanism on the side made of steel tubing 50x30 mm
- Mechanical parts: made from galvanized metal
- Wheels: 4 steerable wheels, 100 mm with rubber tyres. Two having safety locks.
- Storing dimensions: 1605 x 660 x 1580 mm (l x d x h)
- Weight: 120 kg approx.
- Playback use: possible
- Wheelchair friendly: yes

DONIC WALDNER SC

The extremely low priced tournament table in super compact technology with 22 mm high quality top!

Complies with the European Norm DIN EN 14468-1

- Comfortable handling
- 22 mm top
- Space saving
- Completely assembled
- Made in Germany

safety device

Technical data:

- 22 mm top
- Square tubular metal frame with 30x15 mm, epoxy lacquered
- Legs with 40x25 mm steel pipe
- 75 mm rollers move the table without effort, two of them are equipped with a brake

Art.-N° 400 226

- Weight: approx. 95 kgs
- Measures when folded: 1525 x 1565 x 455 mm
- Delivery of the **completely assembled** table in special packaging
- Patented security folding mechanism
- Wheelchair friendly
- Made in Germany

DONIC WALDNER HIGHSCHOOL

This is the extremely low-weight tournament table with the DONIC Super Compact (SC) technology.

Complies with the European Norm DIN EN 14468-1

- 19 mm top
- Comfortable handling
- Space saving
- Completely assembled
- Made in Germany

safety device

Technical data:

- 19 mm top
- Square tubular metal frame with 30x15 mm, epoxy lacquered
- Legs with 40x25 mm steel pipe
- 75mm rollers move the table without effort, two of them are equipped with a brake
- Weight: approx. 90 kgs

Art.-N° 400 215

- Measures when folded: 1525 x 1565 x 455 mm
- Delivery of the **completely assembled** table in special packaging
- Patented security folding mechanism

- Made in Germany

ITTF approved competition table with 25 mm top for a perfect bounce of the ball.

The official table of the Veteran European Championships 2009 in Porec/Croatia ...

...and 2011 in Liberec/Czech Republic.

European norm
DIN EN 14468-1
Made in Germany

Comfortable handling

long-lasting construction

25 mm top

Space saving

Made in Germany

Both table halves have a separate stable automatic undercarriage and a safety locking system.

Technical Details:

- Top: 25mm in green or blue coated with improved lacquer
- Frame: Steel plate 60mm
- Legs: Steel tube 40 x 60 mm, height adjustable
- Undercarriage: Steel tube 40 x 40 mm
- Easy movable wheels: 100 mm with brake.
- Safety locking system.
- Delivery: partly assembled in carton (without net & post set)
- Weight: 124 kg (gross)
- Storage dimensions: 152,5 x 60 x 172 cm (two tables only about 90 cm width)

Art.-No. 400 221

DONIC PERSSON 25

Compliant with the DIN EN 14468-1 regulations

Comfortable handling

Long-lasting construction

25 mm top

Space saving

Made in Germany

We have developed a 25 mm high- quality top, which provides better contact between ball and table. Both table halves have a separate stable automatic undercarriage. Minimum storage dimensions because of a special folding mechanism. All players - including Jürgen Persson, who gave the table its name - are really enthusiastic about the playing characteristics, technical standard and look of this table.

Art.-No. 400 220

Technical data:

- Top: 25mm in blue or green
- Measurements: 1600 x 1620 x 630 mms
- Frame: Steel tube 50 x 20 mm
- Legs: Steel tube 60 x 40 mm
- Metal parts epoxy lacquered or galvanized.
- Weight: about 125 kgs

DONIC COMPACT 25

The new classic DONIC competition table with a 25mm top.

European norm
EN14468-1, class A
Made in Germany

Comfortable handling

long-lasting construction

25 mm top

Space saving

Made in Germany

The table consists of 2 parts which are fixed by connecting components when in the playing position.

Technical Details:

- Top: 25mm green or blue coated with improved lacquer
- Frame: galvanised steel 60mm
- Legs: 60x40mm
- Wheels: 2 driving wheels 128mm
- Delivery: Delivery completely assembled except for the wheels. (without net & post set)
- Weight: 105 kg (gross)
- Storage dimensions: 152,5 x 16,5 x 142 cm

Art.-No. 400 212

Spare parts are available for all tables and net & post sets

i.e. Wheel set:

Art.-No° 430 254 steering wheel
Art.-No° 430 253 wheel with locking device

(for DELHI 25)
(for DELHI 25)

Further spare parts upon request!

DONIC OUTDOOR ROLLER 1000

Robust, weatherproof hobby table with compact technology for highest requirements. Easy handling due to the safety locking system. The 6 mm weatherproof melamine resin top, firmly glued to a metal undercarriage guarantees a high and authentic bounce of the ball. The 50mm metal frame all around the top improves the stability. Undercarriage 50 x 30 mm powder coated square-type tube. Legs strengthened by metal support at the front. Fixed net & post set as well as storage place for balls. Big 128 mm rubber wheels provide stability and easy manoeuvrability even on uneven ground. Playback position possible – you can play on your own.

Safety Norm: EN 14468
 Weight: approx. 75 kg
 Storage dimensions: 152,5 x 69,5 x 155cm
 Delivery: partly assembled
 Art.-No. 230 291

DONIC SKY

Robust, weatherproof, with striking design features. The curved undercarriage is not only extremely strong but also eye-catching. A contemporary metallic appearance in combination with a pleasing blue top surface. Excellent playing characteristics and good looks will give hours of pleasure to every player.

TECHNICAL DATA:

- Constructed from precision steel galvanized tubing, this table can be dismantled into six individual parts. It can also be screwed to the floor if required.
- The table halves are of strong angled steel construction, galvanized, with weatherproof 8 mm melamine resin plates. The top surface can be exchanged. It is, however, extremely stable and weather-proof.
- The net and post set is made of galvanized sheet metal and includes a strong clamp system to hold the net.
- Galvanized frame and edge.
- Table top colour: blue

weather-proof

- Weight: approx. 160 kg
- Delivered in sections but quickly and easily assembled.
- Complies with European industrial regulations DIN EN 14468-1
- The undercarriage is guaranteed for 5 years.
- Made in Germany

Art.-N° 230 265

DONIC World Champion net & post

Designed as a perfect companion to the World Champion TC table. The net and post set selected for the 2006 Liebherr World Team Championships in Bremen. Quality was our main endeavour in producing this outstanding, slim and modern design. The steel plate construction, with additional strengthening, makes this set ideal for every day club use. The standard is of the highest quality "Made in Germany" for great durability – guaranteed!

ROBO-PONG 540[®] ANALOGUE

Accessories see next page!

A MODULAR SYSTEM !!!

Starting with a simple robot for leisure players or kids to sophisticated training machines for top players – select the robot suiting you best with the option to up-grade according your needs and your progressing playing skills.

Step 1: DONIC-NEWGY ROBO-PONG 540

Basic model for the first steps in your work with a robot. The affordable solution for hobby players and beginners. With reduced ball frequency as well as reduced spin/speed for the learning of the basic shots. The robot can be placed all over the table. The frequency of the ball and the spin/speed can be adjusted continuously. The integrated bucket contains up to 100 balls. (Without ball catch net, the ball recycling needs to be done manually.)

ROBO-PONG 540 Package includes:

- Ball thrower (No oscillation)
- Ball bucket
- Mini control box
- Cable clip
- Transformer
- Connector cable
- Owner's manual

Art.-Nr° 420 284

ROBO-PONG 1050[®] DIGITAL

(delivered without balls)

Accessories see next page!

Step 2: DONIC-NEWGY ROBO-PONG 1050

The affordable alternative to Robo-Pong 2050. Identical in every way except it doesn't have the Recycling Net System. Purchase the inexpensive Ball Catch Net separately for ball capture and manual recycling. Or later on, upgrade to full 2050 capabilities with the Recycling Net Upgrade Kit.

1050's Ball Bucket holds 200 balls for several minutes of non-stop-play. Position robot anywhere on top of the table or mount it in our optional Robo-Caddy to get the variety of angles and trajectories.

Technical specifications:

	Robo-Pong 1050
Recycling Net	No
Ball Bucket	Yes (holds 200 balls)
Oscillator Positions	21
Head Angle Adjustments	1 – 13
Speed Range	0 – 30
Factory Drills	64
PC Mode (connect to a PC)	Yes
Balls per Minute	1 – 170
Ball Speed	<10 – 120 km/h
Wheight (net):	4,5 kg
Shot Selection	Topspin, Backspin, Sidespin, counter, Push, Serve, Lob

Art.-N°. 420 273

Ball Catch Net This well priced product enables easy ball collection when used with the ROBO-PONG 540 and 1050 and in conjunction with serve and multiball practice. Placed at the end and sides of the table it will retrieve almost all balls used in practice. Balls are fed to an exit and will accumulate in a collection box or bucket (not supplied), enabling fast refilling of balls into robot. Collapsible for compact storage the "Catch Net" quickly attaches and removes from table. Colour: black, Art.-No. 420 255

In order to up-grade your ROBO-PONG 540 or 1050 we offer modules that can be mounted very easily:

Upgrade Kit 540 to 1040:

Up-grades your ROBO-PONG 540 to the 1040 machine (analogue model). It contains a more powerful control box including the oscillator function as well as a ball basket.

Art.-Nr° 420 286

Recycling Net Upgrade Kit 1050 to 2050:

Up-grades your ROBO-PONG 1050 to the 2050 machine. It contains the complete ball recycling system with ball catch net and ball collecting trays. With instructional DVD. Art.-N° 420 277

Digital Upgrade Kit (whitout pic.)

Transforms your analogue Robo-Pong 2040 or 2000 to a digital Robo-Pong 2050. This upgrade kit consists of a 2050 robot body, digital control box and bracket, universal power supply, shielded connector cable, and 2050 Owner's Manual. Cost effective way to bring your older Robo-Pong into the digital age.

Art.-N°. 420 279

Step 3: DONIC-NEWGY ROBO-PONG 2050 The digital model for competition players and for clubs.

NEWGY™

 BUILDING TOMORROW'S CHAMPIONS

ROBO-PONG
 2050®
 DIGITAL

- * all replacement parts obtainable in the Service Centre
- * light weight (approx. 8 Kg)
- * it requires only a few minutes to assemble and dismantle.

**Always there for you:
 Your own personal training partner.
 Performance enhanced and now even more versatile.**

Robo-Pong goes digital.

DONIC highly recommends its clever Digital Table Tennis Trainer Robo-Pong 2050 for your every requirement. Digital control provides exact control over speed, delivery and precise placement. The Robo-Pong 2050 in normal mode offers simple manual control over all functions such as speed, spin, placement and delivery between strokes. During training one is able to access 64 exercises and practise like a professional. The cell-phone-like menu system is extremely easy to operate and is available in 6 languages. It is possible to create and store your own exercises when hooked up to your Windows PC.

The perfect partner for all skill levels.

The top player can practice on his foot work and stamina, improve his timing and strokes for more speed and placement.

The up and coming player will be able to fine-tune all the important strokes. Advancement in footwork and stamina will come at a much faster pace.

The beginner and hobby player can learn ball control, coordination and most principal shots. One can set up your own training programme by using the 64 drill variations and enjoy the fun with this amazing table tennis partner.

Art.-Nr° 420 272

The Robot Head:

Can deliver up to 170 balls per minute with a maximum speed of 120 km/h. It can be programmed for topspin, counter hitting, side and backspin. Precise ball placement is achieved with 21 oscillating positions and 30 different speeds.

Digital Control Box:

64 chosen exercises which can be programmed for every playing standard (described in the handbook). You may choose ball speed, interval and placement. Windows Computer suitable for your own set exercises. Set-up and instruction handbook.

Ball collection net system

The surrounding net is simply and quickly assembled and taken down. It collects the balls and guides them back to the robot, enabling training to be continued.

Technical specifications:

Technical specifications:	Robo-Pong 2050
Recycling Net	Yes
Ball Bucket	No
Oscillator Positions	21
Head Angle Adjustments	1 – 13
Speed Range	0 – 30
Factory Drills	64
PC Mode (connect to a PC)	Yes
Balls per Minute	1 – 170
Ball Speed	<10 – 120 km/h
Weight (net):	8 kg
Shot Selection	Topspin, Backspin, Sidespin, counter, Push, Serve, Lob

THE ACCESSORIES

ROBO-TOTE-BAG

The ROBO PONG 2050 can be folded up including the net and securely placed into the strong ROBO TOTE-BAG. With the soft carry ROBO-TOTE, the robot can be transported safely to any destination and be set up again to play in minutes.
 Size: approx. 85x30x36 cm

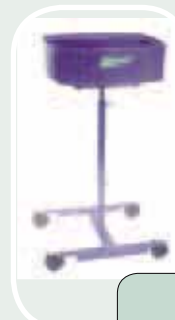

Art.n° 420 252

PONG-MASTER

Three targets count your hits electronically and record your points on a display. So you have exciting and challenging games for any age or skill level. It is healthy and a terrific aerobic exercise for the whole family. Especially interesting for side events during tournaments, for exhibitions and for all kind of competitions. Complete set (LED-display, three electronic targets, adapter, cable)

Art.-No. 420 281

Robo-Caddy

Useful accessory which fits all Robo-Pong models. Robo-Caddy gives added versatility to Robo-Pong robots. Easily control the robot's height from the floor, distance from the table, and angle to the table. Provides remarkable simulation of away-from-table shots like loops, lobs, and chops. Robo-Caddy also makes an excellent ball holder for serve practice or multi-ball training.

Art.-No. 420 253

available in white or orange!

The Ball of many European top teams

Top table tennis today demands placement in millimetres and timing in thousandths of seconds under the highest pressure of spin and speed. This supreme precision of the players requires totally reliable equipment. In particular, the ball plays an essential role at this top level. Highly conscious of this crucial importance, the Donic research team together with the Donic World Champions have developed a production line to incorporate the highest manufacturing standards and quality control.

- Selection of celluloid raw material according to hardness and colour
- Selection of the pre-cut ball halves according to thickness and weight
- Control of the ball seam
- Control and selection of the ball diameter (all around)
- Selection of the ball according to the weight
- Triple control and selection by roundness (veer and over all sphericity)
- Control of the regularity of the bounce
- ITTF approved

The overall result: A ball that is unmatched in precision, consistency and regularity. The ball for the top table tennis of today.

Hard, elastic, sensitive

Art.N° 270 271
Suitable for demanding playing techniques with good spin at high speed. With concave handle and with Vari Slick 2.0 mm rubber sheets.

DONIC TT-Set WALDNER 400

NEW

ABP-TECHNOLOGY

The ABP allows an individual adjustment of the balance point of the bat towards the style of play. Head balanced: Weight distribution towards the head of the bat offering more striking power for an attack style of play. Mid balanced: Weight is evenly distributed on the bat for an allround style of play. Handle balanced: Weight is distributed closer to the handle of the bat allowing more accurate shots for a control style of play and passive game. Simply turn, pull and adjust!

***Models with ABP-Technology:**
Waldner 600-1000

DONIC TT-Set WALDNER 400
Set consisting of 2 DONIC Waldner 400 bats and 3 balls * in a carrying bag.
Art.-no. 210 265

PLS-Power Light System

The hollow handle reduces the total weight of the racket and transfers the centre of gravity towards the head of the blade thus offering much more power and speed while maintaining excellent feel. Improved vibration characteristics influence the game positively.

Result: Less Weight + Better Balance = More Power

****Models with PLS: Waldner 500_**

AVS - Anti Vibration System

AVS is the shock-absorbing system developed by DONIC. AVS offers improved ball control and reduced vibrations caused by the impact energy of the ball due to two special shock-absorbing soft layers laminated between blade and handle.

Result: Less vibration and more control

*****Models with AVS: Waldner 400**

YOUNG CHAMPS
