### BAROFORCE™ TECHNOLOGY

baroForce™

(bare-o-force) Maximum air pressure (1 bar) technology to create a rigid structure

1. An interior, flexible layer of thermoplastic polymer.

2. A middle layer of high-tenacity yarn, providing increased durability and rigidity once fully pressurized.

3. An additional exterior layer of thermoplastic polymer that stiffens at full pressure, giving all BaroForce™ frames a solid, firm, outer surface.
